Morning Leigh,

We've completed a topographic survey of our property. I've also identified an engineer to create the Mining Plan map and Reclamation Map, that work is currently in process and should be completed by the end of the week. I'll submit those as soon as they are complete.

Our public hearing for our local permit with Gilpin County is scheduled for next Tuesday, April 22nd. The county staff and consultants are recommending the Board of County Commissioners approve our permit on the condition we get a 110d permit.

Have you had a chance to review our other application materials? We're happy to get on a call if needed to talk through any elements of the application. Our decision date with DRMS is Friday, April 18th and we may need to extend that again, depending on where things stand.
