**RE: Debeque Pit, Permit No. M-2011-054, Inspection Problem Abated**

Dear Mrs. Bartuska:

On September 24, 2024 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Topsoil was cited as a problem for failing to protect topsoil by establishing vegetation while stockpiled. Corrective actions required you seed the existing stockpiles which will not be used within 180 days by the corrective action date.

On May 1, 2025 the Division received written notification and photo documentation that seeding occurred on January 1, 2025. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
