RE: Denial Letter; Technical Revision No. 2 (TR-2) – Design Drawings for Reservoir Liner; Windsor East Mine, Permit No. M-2022-042

Dear Ms. Mikulas:

On March 27, 2025, the Division of Reclamation, Mining and Safety (Division/DRMS) received your request for Technical Revision No. 2 (TR-2) which was the submittal of reservoir liner design drawings to satisfy a commitment made during the original permitting process at the Windsor East Mine, Permit No. M-2022-042.

On April 11, 2025, the Division sent you its Preliminary Adequacy Letter for TR-2. The decision date for the application was April 26, 2025. To date the Division has not received your responses to the letter nor has an extension request been received. Therefore, the Division has denied TR-2.

Because TR-2 was submitted to satisfy commitments made during the original permitting process this item remains outstanding and needs to be addressed to the Divisions satisfaction. The Operator will need to submit another technical revision that addresses the outstanding adequacy items of TR-2 within 30 days of the date of this letter

If you need additional information, please contact me by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
