RE: M-1994-081

Mr. Girardi,

Please find better pictures attached to this email of the signage that was placed. I overlooked that section of the letter or I would have had them to you sooner. These should be much more legible. There are actually three signs, one at each entrance.

We are still working on the Technical Revision, but it should be submitted soon. It is in the process of being drafted and written up. I will let you know when it is on the way.

We checked with Sara Stevenson-Benn about potential payment plans for our surety increase as you mentioned, but was told there are no such payment options, therefore we are seeking other options.

We appreciate you continuing to work with us on all these matters, and hope to have them all resolved as soon as possible.

Brandon Garrison  
Operations Manager  
Mortensen's L & I
