## Annual State of the Business

As you know, we shuttered our daily operations of producing and delivering sand and gravel as of October 31, 2022. We are still currently looking for other companies to either contract to buy our existing stockpiles of materials or to lease the pit for their own operation of processing sand and gravel. We have not reclaimed any opened land for this reason as there are many tons of sellable materials to be mined. We have installed cellular video cameras at our gates and throughout our pit. We installed more NO Trespassing signs surrounding our property.

Additionally, our inspection contact information is no longer correct. Chris Roeder is no longer a valid contact. My contact information as permit contact is still good. I look forward to meeting with Dustin Czapla sometime this summer for inspection of the pit. I am planning to be in Leadville during the last week in July through the first week in August. Also, my sister Amy Holland who lives in Hooper, Colorado may be available.

Best Regards,

Daryl Webster
