Hi Kathy,

Attached is a copy of the annual report for the Hukill Gulch Millsite facility. I have mailed a hard copy to the Water Quality Control Div. The mill is not currently operating and hasn't been in operation for several years. We plan to upgrade the mill this year and start operations in 2026, so it is important that we are in compliance with our permit. There never has been any discharge from this facility. Do I need to file quarterly reports or will this annual be all we need?

Thanks

Mr. Maher,

I got your message requesting a form for the certification you have under the COR040000 general permit.

You didn't mention the form you are looking for, but if you need the Annual Report form, I've attached it for your use.

Please let me know if you have other questions,

Each section must be completed. Please print or type.

A. *A report on the facility's overall compliance with the SWMP. (Include here a summary of any measures taken to comply with your Stormwater Management Plan (SWMP), to fully implement it, changes or improvements made in any of your Best Management Practices (BMPs), employee training, spills, other problems encountered, etc. How is your plan working?)*
 No operations have occurred at this site for several years. The Hukill Gulch Millsite ~~stormwater retention facility drains a very small area. To the best of my knowledge no~~ water has ever been discharged from this facility. Periodically some rain water collects in the facility but quickly sinks into the ground.

Were changes made to your SWMP? ☒ No ☐ Yes - Describe changes on a separate sheet.

B. *A summary of each comprehensive stormwater facility inspection made, including date, findings, and action taken. (The permit requires at least two comprehensive facility inspections per year - see page 12 of the permit. Include here a summary of those inspections, plus any other comprehensive inspections made. It is not necessary to summarize day-to-day inspections, unless significant problems were noted.)*
 First Inspection - Date 06/30/24. Findings, and action taken: The facility was dry. No action was taken.

Second Inspection - Date __/__/__. Findings, and action taken: _____

Other Inspections - Date __/__/__. Findings, and action taken: _____
 Many visual inspections were preformed from 2009 until the present. No inspections were
preformed during rain storms and no action was taken.

C. *Results and interpretation of any stormwater monitoring performed. Attach a separate sheet with the lab results. (Monitoring is **not** a requirement under the permit, unless you were specifically directed to do so by the Division. However, the results of any stormwater monitoring that you performed on your own should be reported here.)*
 Monitoring Results Attached? ☒ No ☐ Yes
