Hello Nikie,

I hope you are doing well. Attached are some photos of some further completed action items:

We have moved the lime pile to the ore shed (photos sent previously)

We have installed new silt fencing around the downhill boundary of the upper permit area (photos sent previously)

We have removed the spaghetti pile of pipe from the stormwater holding area (photos attached)

We have re-marked the boundary corners of the permit area below the tailings area (photos attached)

Patrick Maher and I have called the CDPHE to discuss the stormwater permit reporting ( they seemed quite unconcerned with our infrequent reporting, but there is nothing to report so that makes sense ). We have also filed an updated annual report with CDPHE, and inquired if they need anything more from us; they have yet to reply.

Thank you,

Mason Drake
