RE: Ted Franciscotti Pit #1 Permit M2007-006 Technical Revision 2 (TR2), Adequacy Review #2 Response

Mrs. Gibson,

Please see the responses to Adequacy Review #2.

- 1. The applicant concurs and has resubmitted the maps.
- 2. The applicant concurs and wants to clarify that the Phase 1 Historical area that was in the previous 111 permit will not be disturbed in any fashion throughout mining operations.
- 3. Topsoil and overburden piles will be placed around the perimeter of the active mine area, which will move throughout the site. The piles will thus be closer to the areas that they will be used for reclamation purposes. Please see the updated map.
- 4. No response needed.
- 5. This Historical portion of Phase 1 will only need reseeding, possibly, as it will not be disturbed. It will not need topsoil placement.
- 6. No response needed.
- 7. No response needed.
- 8. No response needed.
- 9. Yes, the central location is the location for the current overburden stockpile. However, that stockpile will move as stated above in question 3. Overburden will be used on the pit floor to help with lessening the slopes and prepping the site for topsoil and seeding. Please see the updated map.
- 10. The current lease has a section in it that addresses this situation. There is no need for a new lease.
 - 13. Assignment.

The provisions of this Lease shall extend to and be binding upon the heirs, personal representatives, successors, assigns and sub lessees of Lessor and the Company. The Company shall have the right to assign this lease without the express written consent of the Lessor.
