**RE: Gold Hill Mill and Cash & Who Do Mines, Permit No. M-1994-117 and M-1983-141  
Technical Revision – Sampling for Care and Maintenance**

Colorado Milling Company, the permittee for Gold Hill Mill and the Cash and Who Do Mines, is currently engaged in litigation with Boulder County regarding the conservation easement that covers the Gold Hill Mill property. Due to this litigation, operations at the mill are being maintained with minimal activity. Due to this minimal activity, the permittee would like to reduce the groundwater and surface water sampling requirements for each quarter to the following:

Sample Locations	Sample Type
<b>Gold Hill Mill</b>	
<b>W-1</b>	Groundwater
<b>W-2</b>	Groundwater
<b>W-3</b>	Groundwater
<b>W-4</b>	Groundwater
<b>MW-1</b>	Groundwater
<b>TP</b>	Surface water
<b>Cash &amp; Who Do Mines</b>	
<b>MW-5</b>	Groundwater
<b>CG</b>	Surface water
<b>CMP</b>	Surface water

Sample Parameters (all Locations)
Depth
pH
Temp (C)
Conductivity (uS/cm)
Arsenic (dissolved)
Cadmium (dissolved)
Manganese (dissolved)
Zinc (dissolved)
Total Dissolved Solids
Sulfate

This sample suite is consistent with long running sampling on the site. At least five quarters prior to the placement of new tailings within the tailings storage facility at Gold Hill Mill, the permittee will return to the sampling suite and schedule outlined in the currently approved conversion (CN-1). Five quarters prior to any ore departing the Cash & Who Do mines, sampling will return to the currently approved suite and schedule from the currently approved permit.

Regards,
