Date: June 11, 2025
Subject: TR-03 for Bennett Pit (File No. M-2016-085);
Review of adequacy response and spillway design

I reviewed the operator's adequacy response for TR-03 for the Bennett Pit, per your request.

Based on my review and our phone conversation with the operator and his consultant, I do not have any additional adequacy items. The analysis for the spillway design is adequate.

Also, I think that it is important that the operator follows the plan to fill the reservoir with water in a timely manner as they stated in our meeting. Please ensure that they have committed to this in their permit.
