**Re: Trapper Mining Inc., Permit No. C-1981-010
Permit Revision PR-12**

The Colorado Division of Reclamation Mining and Safety (CDRMS) recently approved the above-referenced revision. The CDRMS decision form is enclosed.

Trapper sent a complete application package for this renewal/revision under cover of October 10, 2024. During the CDRMS review period several adequacy revisions were made to the original materials, additional materials were also supplied. The list below shows the permit materials that have been updated through correspondence with CDRMS. Prior versions of these pages previously submitted may be discarded as necessary with updated versions included with this correspondence. Some attached pages are new due to changes made during the revision process. One Appendix Q section was also updated and is included as outlined below.

The following enclosed permit pages originally submitted to you with PR-12 have been modified and should be replaced in your original copy of the PR-12 permit document before replacing the same pages in the Trapper Permit:

4-186a (Table 4.8-6), 4-190a, Table 4.8-7

The following enclosed permit pages were modified since the original PR-12 submittal and should either replace the same pages in the Trapper Permit or are new materials:

1-5, 1-6, 1-7, 1-7a

Enclosed Appendix Q materials should replace the original PR-12 Appendix Q submission.

Appendix Q, Sec. I; West Buzzard Hydrologic Model and As-Built map for West Buzzard #3

Please get back to us with any questions, comments or concerns.

Sincerely,

A handwritten signature in cursive script, appearing to read "Graham Roberts", followed by a horizontal line.

Graham Roberts
Environmental Supervisor
