Re: Cresson Project - File No. M-1980-244
Cripple Creek & Victor Gold Mining Company Technical Revision (TR-148)
ECOSA Long Term Study Plan

Dear Bjorn Meyer,

On June 25, 2025, the Division of Reclamation, Mining and Safety concluded its review of the Technical Revision application submitted to the Division on May 29, 2025, addressing the following:

The East Cresson Overburden Storage Area (ECOSA) Long-Term Study Plan focuses on developing a long-term, technically supported, and environmentally responsible strategy to prevent groundwater contamination of Grassy Valley and stop the seeps along the perimeter of the ECOSA.

The decision reached by the Division is: **approve**.

The terms of Technical Revision No. 148 approved by the Division are hereby incorporated into Permit No. M-1980-244. All other conditions and requirements of Permit No. M-1980-244 remain in full force and effect.

Please note that TR-148 was submitted as the long-term corrective action outlining the plan to investigate and develop a permanent long-term strategy to prevent groundwater contamination of Grassy Valley and stop the seeps along the perimeter of the ECOSA, as specified in the Stipulated Agreement for MV-2024-027.

If you need additional information or have any questions, please contact me by telephone at **720-665-0836**, or by email at patrick.lennberg@state.co.us.

Sincerely,

A handwritten signature in blue ink, appearing to read "Patrick Lennberg". The signature is fluid and cursive, with the first name "Patrick" written in a larger, more prominent script than the last name "Lennberg".

Patrick Lennberg
