**RE: Coyote Ridge – M-2000-052  
Technical Revision – Change to Intermittent Status**

Dear Ms. Carter:

Rocky Mountain Materials & Asphalt, Inc. submits the attached Technical Revision Application for Intermittent Status for permit M-2000-052.

Mining activities occur each year at this site, typically from October to December, but for limited time periods of less than 180 total days each year. Material is removed from this site and taken to a neighboring operation for processing and sale. Since mining activity occurs each year, Intermittent Status is appropriate for this permit.

No changes to the mining plan, reclamation plan or affected area result from this revision.

Please let me know if you have any questions or need any additional information.

Sincerely,

Phillip J. Courtney  
Land Manager
