**Re: Henderson Development, Permit No. M1980110
2nd Quarter 2025 Groundwater Monitoring Data Acceptance**

Dear Mr. Slack,

On March 28, 2025, the Division of Reclamation, Mining and Safety (Division) received the quarterly groundwater report and elevation data for the Henderson Development/Sandy Acres Pit.

Per the approved Groundwater Monitoring Plan in Technical Revision 6, the Operator is required to sample six groundwater monitoring wells (MW-1-MW-6) and submit the data quarterly.

The Division reviewed the report and followed up with a phone call to discuss the ongoing mitigation. As noted in the report, groundwater levels are dropping at the north end of the pit indicating the sump is working. The operator continues to evaluate the conditions in the middle and south cells and plans to connect additional sections to the perimeter channel and modify the berms as needed.

Thank you for continuing to inform the Division of the groundwater mitigation work at the site. If you have any questions regarding this permit, please contact me via email at nikie.gagnon@state.co.us or by phone at (720)527-1640.

Sincerely,

Nikie Gagnon
Environmental Protection Specialist
