Subject/Operator/Operation/File No. Emergency Notification of VLF2 Off-liner Spill,  
Cresson Project, Permit No. M-1980-244

Type of Interaction: Meeting ☒ Phone ☐ Other

Person(s) contacted and affiliation: Johnna Gonzalez (CC&V)

**Summary and Resolution of Interaction:**

At 3:04 PM, June 26, 2025, Johnna Gonzalez called to inform the Division of an off-liner spill between the PSSA and ADR2 at the Valley Leach Facility 2 (VLF2). Johnna explained that a broken leach drip line was the likely cause of the spill. The spill occurred around 8:40am on the morning of the call date. The solution drip line was turned off once the spill was noted and the line stopped flowing entirely by around 11:00am that same day. At the time of notice, Johnna stated that the engineer of record was confirming the location of the edge of liner and noted that excavators had already begun cleanup efforts. Johnna stated that samples were also being taken of the affected area with plans to dig/scrape up all impacted soils and place them onto the lined facility. CC&V intends to provide the required follow-up notice pursuant to Rule 8.2.3.
