Hello,

I would like to ask for an extension for the SL-2 inspection problem #1 corrective action as well as the weed corrective action deadline from June 29, 2025 to July 29, 2025 for the Bijou Clay Mine M-1997-007.

I met with representatives from H2 Environmental Consultants on Tuesday the 24th at the mine site. They want to fly the site for the most current topography in order to provide an accurate quote for the work necessary. I will let you know when this is accomplished as we won't have a better idea of a timeline until then.

I want to do the weed spraying either just before or after the other corrective action depending on what is recommended by H2.

Thank you,

Richard Murphy
