Hunter and all,

My apologies - apparently my eyes are to blame. I still do not have 20-20.
I did not read #3 correctly, I thought it said liner.

Mr. Colborn informed me that the question is about LINE not LINER.
And gave me the measurements for the WATER LINE :

His original measurement was 25' but he is modifying that to
40 ft buried and 50 ft above ground to cover the angle needed.

Do you need this in a formal letter?

Again my apologies.

Lisa
