Dear Ms. Gagnon,

Mason Drake of Venture Resources Inc. tested both the up-gradient and down-gradient wells at the Hukill Gulch millsite on June 15, 2025. The results are as follows:

Up-gradient well:

- 1) Unlocked and opened the security cap.
- 2) Inserted a geotech .84x12 inch bailer-style sampler into the casing and lowered it via a clean nylon cord.
- 3) Let sampler reside on bottom for 4 minutes.
- 4) No water was collected and therefore the well was dry.

Down- gradient well:

- 1) Unlocked and opened the security cap.
- 2) Inserted a geotech .84x12 inch bailer-style sampler into the casing and lowered it via a clean nylon cord.
- 3) Let sampler reside on bottom for 4 minutes.
- 4) No water was collected and therefore the well was dry.
