Final Abandonment Report – NOI P-2023-014

During the 2024-2025 reporting period, a total of 13 exploration drill holes were completed and subsequently abandoned. Each drill hole was located within the permitted disturbance boundary of the West Side Placer Bulk Sample Program. The drill holes were approximately 10 feet by 10 feet in surface disturbance area.

Upon completion of drilling, each hole was backfilled to the surface, and stockpiled topsoil was replaced. No artesian flow or water encounter was observed in any hole. Surface grading restored the area to approximate original contour, consistent with the approved NOI and Rule 5.7 of the Colorado Minerals Program.

Abandonment was completed within one year of drilling, and no further safeguarding was necessary.

Drill Hole Locations

Drill Hole ID	Latitude	Longitude
CO-AuPt-25-001	40.987738	-107.900385
