

Cheyenne County, Colorado

Rother Pit #2

A portion of the NW 1/4, Section 24, T16S, R43W, 6th P.M.,
Cheyenne County, Colorado

Property Description

Rother Pit #2

A tract of land located in the North half of the Northeast Quarter (NW 1/4) of Section 24, Township 16 South, Range 43 West of the 6th Principal Meridian, Cheyenne County, Colorado.

Mining Plan

1. Mine all excavations in the NW 1/4 of the east portion of the hillside areas of the approximately 10-acre permitted area and programmatic area included. The 10-foot buffer zone separates the mine back and the area of operations. A 10-foot buffer zone separates the western mine boundary from the operations in the nearby area. The pit will be graded by digging the approximately 0.5-Sect of top soil to the edges of the 40-foot buffer to create a berm and grades are approximated. This can be done in accordance with the reclamation plan.
2. Mining will begin by digging the approximately 0.5-Sect of top soil to the edges of the 40-foot buffer to create a berm and grades are approximated.
3. Upon digging the approximate 0.5-Sect of top soil, grading of stable soils will begin to the approximate levels and grades shown in this diagram. Cheyenne County will take great care during regrading to not extend the excavation beyond the buffer zone.
4. The extent of the sand and gravel to be moved is determined until Cheyenne County starts removing the perimeter area. The grades and depth of the excavation area are approximate and could change depending on the site conditions during excavation.
5. The fill mining plan is included in Exhibit C of the Mining Application.

Reclamation Plan

1. Once final excavation grades are set in the excavation area, top soils will be placed over the excavated area to begin the reclamation process of the mining process.
2. Once the top soil is applied over the excavation area, the disturbed area will be fertilized and reseeded as needed.
3. The topsoil in the pit will be removed and returned back to its natural condition.
4. The full reclamation plan is included in Exhibit C of the Mining Application.
