

Notes:

Please refer to the 2024-2025 Annual Report Map for the location of the areas discussed below. The numbered discussions refer to the annual report form question numbers. Mining commenced in the fall of 2024 and continues as there is demand for material. No reclamation was required at this time and no weed control was needed this year.

8. The following list outlined the various areas of disturbance at the mine.

Description	Acres	Volume
Growth medium Piles	0.18 (Tan)	~1,500 cyd
Partially mined area	0.94 (Yellow)	
Stripped	0.88 (Orange)	
Partially backfilled & sloped	na	
Resoiled and seeded	na	
Totals	2.00	1,500

Mining commenced on the east side of the disturbed area and has worked west. There is approximately 800 linear feet of working face and three levels of mined area where mining is taking place. The mined area has not reached bedrock. Side sloping will begin once the mining limits are reached.

9. Approximately 2.0 acres was stripped and partially mine, The growth medium was placed in piles along the south side of the stripped area.
10. No reclamation is required at this time.
19. The bond was set on July 15, 2024 by the Division and is currently \$18,600.00. It is adequate to cover the reclamation costs for the disturbance at the mine.
