Hello Andrea, Chris and Linda...

I've been informed by Solitario management that they would like to postpone drilling at Cat Creek until next year (After July 1, 2026). We have been doing some additional geologic mapping this summer and would like to incorporate that data into our conceptual mineral model before putting a drill onsite. Moving forward, I plan on setting up an ePermitting account for the project soon. Feel free to reach out with any questions anytime.

Regards,
