Good evening Mr. Walker,

I am reaching out to see if you have that document providing an updated timeline of reclamation tasks for this site.

Please provide the timeline as soon as possible as we are past the extended corrective action due date of August 1, 2025.

Thank you so much,
Jocelyn

Good morning Jocelyn,

The last e-mail dated July 25 2025 had my timeline in it. . The updates on the reclamation timeline will be to be complete by November 30 2025. With the exception of removal of mining equipment as I plan to store all of the trucks, equipment and supplies on my personal property.

Is there something more that I need to send you ??? As an update I have got equipment in place to start the reclamation process ASAP.

Thanks

Ron

Good morning Mr. Walker,

There are two followup questions I have:

When do you anticipate having the earthworks completed?
When will you be seeding the area?

Thanks,
Jocelyn

Jocelyn,

I anticipate having the earthwork complete by Sept. 30 or before with the seeding to follow soon after. Do we just need to seed what we disturb during the earthwork process as everything else has already naturally reseeded over the last 15 years.

Mr. Walker,

Thank you for providing these dates. Yes, please seed the areas that get disturbed from the earthwork.

The Division considered the problem cited in the May 21, 2025, inspection report regarding Reclamation Success for the AZCO Pit, Permit No. M-2004-029, to be abated.

Please let me know if you have any questions or concerns.

Thanks,
Jocelyn
