Hello All,

We sampled SW-AWD and SW-BPL today. SW-AWD was dry, so we were unable to grab samples (see pictures below). Unfortunately, there was an error, and we were unable to grab a copy the COC for the BPL sample before sending it out. I will send out the COC when it is received by the lab.

Here are some pictures from the sampling:

8/7	Upstream	Sample Location	Downstream
SW-AWD (DRY)			
SW-BPL			

The water samples had the following characteristics (measured in stream):

Sample Location	SW-AWD	SW-BPL
Temperature (°C)	N/A	20.7
pH (s.u.)	N/A	8.16
Conductivity (uS/cm)	N/A	235.7
ORP (mV)	N/A	98

Please let me know if you have any questions.

Thanks,

Chris Prosper
