RE: Urie Gravel Pit, Permit No. M-2009-038, Inspection Problem Abated

Dear Mr. Sanford:

On July 9, 2025 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Right of Entry was cited as a problem for failure to maintain legal right of entry. Corrective actions required you provide an updated legal right of entry now that the property transaction is finalized by the corrective action date.

On August 19, 2025 the Division received the updated legal right of entry which matches the current owners of record and operator. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
