Dear Chris:

Please find attached the reclamation map with contours to be Attachment C to my response submitted last night.

As you will see, I had to remove many of the features and labels in Exhibit E-2 to try and make it easier to see the contours. I think my draftsman and I sort of succeeded.

As discussed, the area is very flat and beyond the riverbanks and the pond shore and protective berm, there is very little elevation change over the 9.9 acres.

Please let me know any questions.

Thanks,
