RE: Urie Gravel Pit, Permit No. M-2009-038, Inspection Problem Abated

Dear Mr. Sanford:

On July 9, 2025 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above reference site. Signs & Markers was cited as a problem for failure to display the current permittee name on the mine sign. Corrective actions required you provide photo documentation that the mine sign had been updated/replaced to reflect the current information by the corrective action date.

On August 25, 2025 the Division received photo documentation of the updated mine sign with the correct permittee name displayed. This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
