LBCR, LLC
Technical Revision (TR-5)
Importation of clean inert material for backfill

Dear Todd Fisher:

On August 28, 2025 the Division of Reclamation, Mining and Safety concluded its review of the Technical Revision application submitted to the Division on August 27, 2025, addressing the following:

Use material that was dumped on site before mining (concrete) and materials to be imported from off-site (cuttings and hydrovac soil) as backfill for final grade and reclamation. All materials are to be clean, inert, and inspected at the point of origin and before final placement.

The decision reached by the Division is: approve.

The terms of Technical Revision No. 5 approved by the Division are hereby incorporated into Permit No. M-1992-054. All other conditions and requirements of Permit No. M-1992-054 remain in full force and effect.

If you have any questions, please contact me by telephone at (970) 433-8393, or by email at dustin.czapla@state.co.us.

Sincerely,

Dustin M. Czapla
Environmental Protection Specialist
