RE: File No. M-2008-017 Derr Pit – Summary for September 2025 3rd Quarter Water Level Reporting

Dear Ms. Gagnon,

We are submitting this letter and summary for the September 3rd Quarter Water Level Reporting on behalf of W.W. Clyde & Co.

We are providing this summary letter to discuss and provide information in regard to the September off-site an on-site monitor wells and provide the dewatering volumes pumped for August.

During the month of August a total of 0.0 acre-feet was pumped and discharged into the on-site recharge ponds within the Derr Pit.

AgPro was able to get all the normal monthly readings/measurements on all of the off-site wells for the September readings. The on-site monitor wells saw increases and decreases in the elevation of the water levels. The water level elevations in the monitor wells on the Phase 1-4 portion of the pit went up on the south side by 0.27 feet and down by 0.39 feet on the north side. The water level elevations in the monitor wells on the upper terrace of the permit area increased by 0.18 feet for MW-14, increased by 0.05 feet for MW-15, increased by 0.15 feet for MW-16, increased 0.19 feet for MW-17, and increased by 0.19 feet for MW-18.

Please let us know if you have any questions or concerns.

Sincerely,

J.C. York, P.E.

September 30, 2025

Mr. Dave Bliss
40738 Poudre Canyon
Bellevue, CO 80512

Dear Mr. Bliss:

AGPROfessionals' staff have been monitoring groundwater elevations on behalf of W.W. Clyde & Co. at your property. We perform this monitoring once a quarter. Attached is the elevation we recorded on September 11, 2025.

Identifier	Depth to Water from Ground Surface (ft.)
Bliss Irr	48.47

Has the 2-foot trigger point for two consecutive months been met?

- ☐ Yes
☒ No

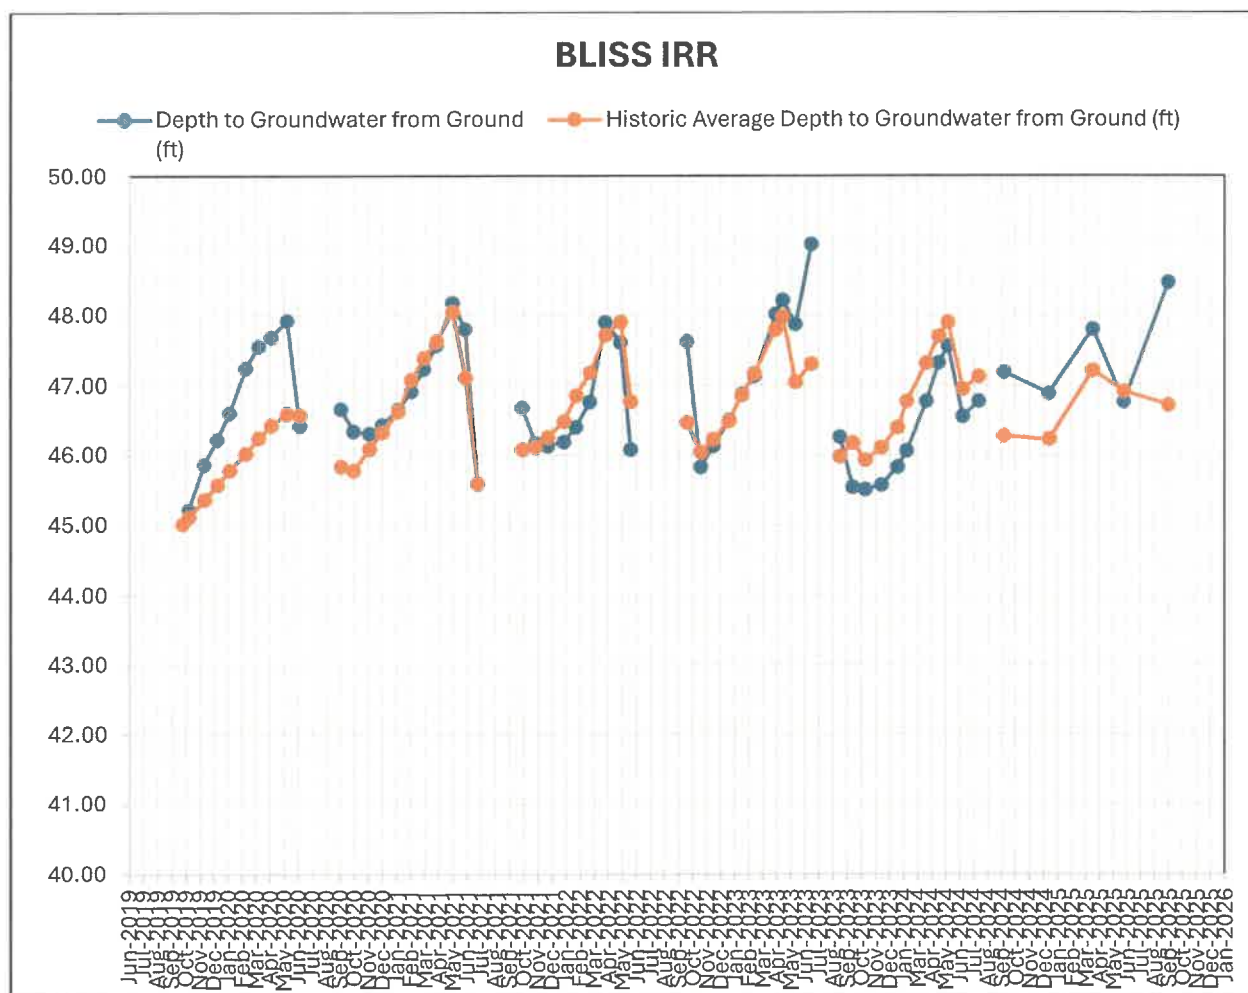

Please find the attached table and graph representing the data collected to this date. Please do not hesitate to contact me regarding these activities.

Sincerely,

Miguel Meha,
Agronomist
(970) 571-9081

September 11, 2025	48.47	No

Notes:

- 1) Graph displays Depth to Groundwater (lower depth to groundwater reading means higher water table elevation).
- 2) Trigger point is described in Settlement Agreement.
- 3) Since Historical Data was not established until September 2020, a year-to-date running average was used to compute historical average. As of September 2020, the historical average is computed as described in Settlement Agreement.

FRANCIS #1 STOCK

Notes:

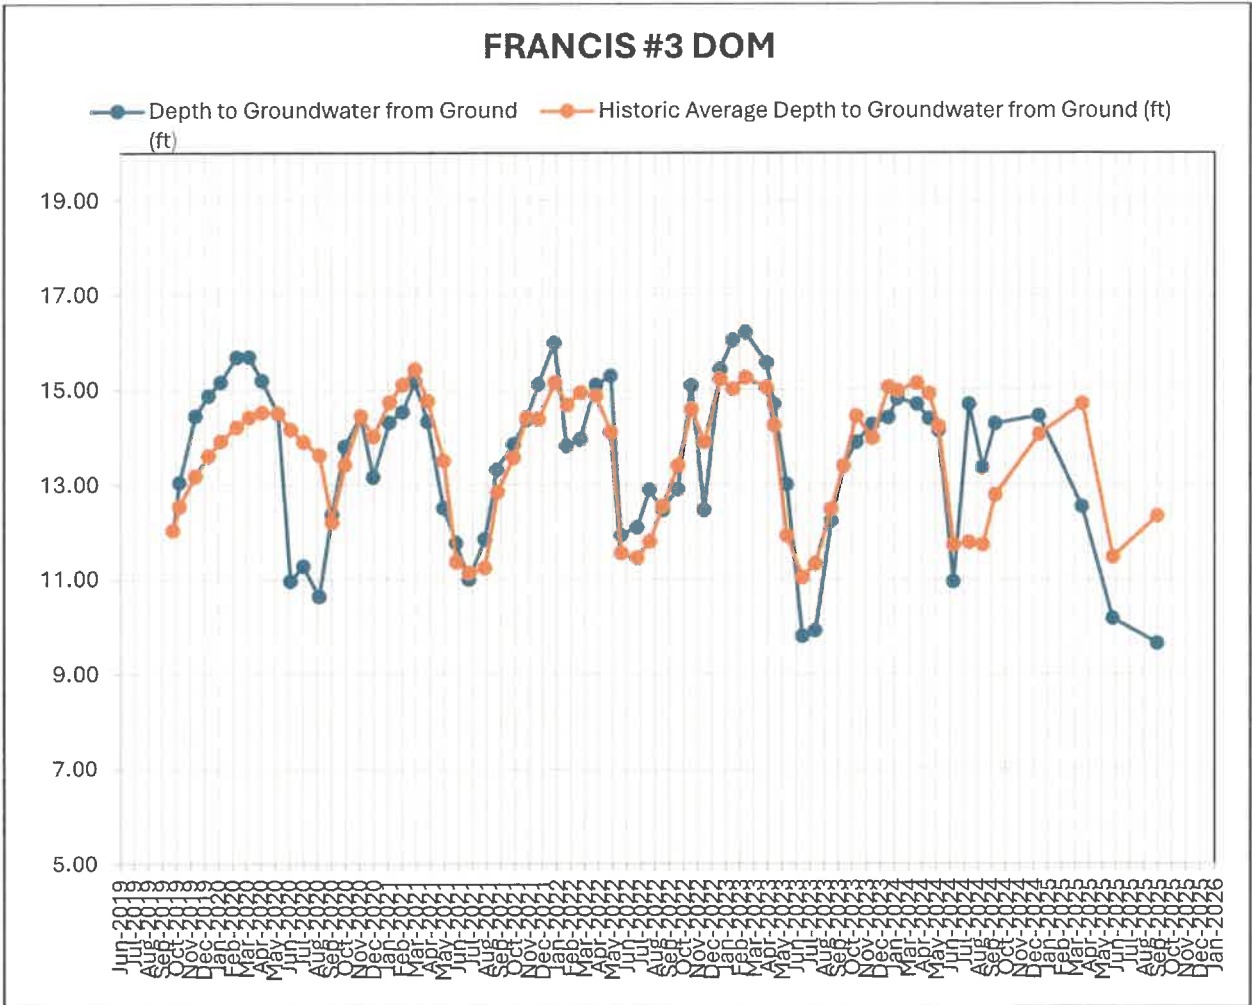

- 1) Graph displays Depth to Groundwater (lower depth to groundwater reading means higher water table elevation).
- 2) Trigger point is described in Settlement Agreement.
- 3) Since Historical Data was not established until September 2020, a year-to-date running average was used to compute historical average. As of September 2020, the historical average is computed as described in Settlement Agreement.

FRANCIS #2 IRR

The graph displays two data series over a 30-year period from 1990 to 2020. The Y-axis represents the depth to groundwater in feet, ranging from 5.00 to 19.00. The X-axis represents the year. The 'Depth to Groundwater from Ground (ft)' series is shown as a dark blue line with circular markers, and the 'Historic Average Depth to Groundwater from Ground (ft)' series is shown as an orange line with circular markers. Both series show significant seasonal fluctuations, with peaks typically occurring in the summer months and troughs in the winter months. The historic average line generally follows the trend of the individual measurements, providing a smoothed view of the data.

Year	Depth to Groundwater from Ground (ft)	Historic Average Depth to Groundwater from Ground (ft)
1990	10.8	10.8
1991	12.5	11.5
1992	13.5	12.0
1993	13.5	12.0
1994	13.0	12.0
1995	11.5	11.5
1996	8.8	10.5
1997	7.8	9.5
1998	11.8	11.5
1999	12.5	12.5

- Notes:
- 1) Graph displays Depth to Groundwater (lower depth to groundwater reading means higher water table elevation).
 - 2) Trigger point is described in Settlement Agreement.
 - 3) Since Historical Data was not established until September 2020, a year-to-date running average was used to compute historical average. As of September 2020, the historical average is computed as described in Settlement Agreement.

Well Designation	Global Assets Davis Irr	
Date	Depth to Groundwater from Ground (ft)	Trigger Level of 2 feet below Historic Average Level Met (Yes or No) Start in May 2020
