Amy,

General Shale would propose going back to the original plan regarding updating the reclamation plan text for the disturbance in Phase IV with a technical revision. We will target to meet the amendment due date of December 26.

We would propose the following to draft the updated reclamation plan:

1. Contact the landowner to determine if he wants the holes filled in and reclaimed. We will also offer leaving the holes as ponds as an option pending SEO approval of livestock tanks for the property. This could take some time depending on how responsive the landowner is.
2. Update the reclamation plan for the Phase IV disturbances based on Landowner input.
 - a. We will list the timeline for completing the reclamation or pond grading/permitting.

Best Regards,

Jason E. McGraw**Mine Supervisor****General Shale** | www.generalshale.com
