Nikie,

I mistakenly omitted the conveyor portion when sending out structure agreements. I updated the full submittal (attached) with the 10 new structure owners. I'm currently working with Tetra Tech to complete the Geotechnical Stability Exhibit since I'll most likely get little to no structure agreements back.

Thank you,

Hi Wyatt.

Yes, you can attach previous slope stability analyses to a response letter but it might not be adequate if anything has changed out there. I recommend that you submit a table that lists all the structures within 200 feet of the mine area and conveyor, the owner of the structure, and add a column to indicate whether the structure is addressed in an engineering report or if you are including a signed agreement. I attached Exhibit S from AM1 approved in 2019. You will likely need both AM1 and AM2 engineering reports in your response.

Basically, for a transfer application, you need to meet the requirements of Rule 6.4.19 Exhibit S as if this were a new application. It might be worth your time to generate a map of the structures within 200 feet to ensure you've covered everything. The structures and owners may have changed since AM1 and AM2.

Let me know if you have any questions on how to proceed.

Nikie,

Can we utilize the Amendment 2 slope stability analysis that references the structures within 200 feet (attached) to satisfy the engineering evaluation? The only change is the south parcel is no longer within our permit boundary.

## REQUEST FOR TRANSFER OF MINERAL PERMIT AND SUCCESSION OF OPERATORS APPLICATION PACKET

*The Mined Land Reclamation Board ("Board") has approved this Transfer of a Mineral Permit and Succession of Operators Application Packet pursuant to the Mined Land Reclamation Act (C.R.S. § 34-32-101 et. seq.) ("Hard Rock Act") and associated Rules (2 C.C.R. 407-1) ("Hard Rock Rules") and the Land Reclamation Act for the Extraction of Construction Materials (C.R.S. § 34-32.5-101 et. seq.) ("Construction Materials Act") and associated Rules (2 C.C.R. 407-4) ("Construction Materials Rules"). This Application Packet cannot be altered without the consent of the Board.*

### Applicability

This Transfer of a Mineral Permit and Succession of Operators Application Packet applies to mining operations where the current permitted mine operator ("Permittee") wishes to transfer the Reclamation Permit ("Permit"), along with all associated reclamation responsibilities and liabilities, to a Successor Operator ("Successor"). This process is referred to as a Succession of Operators ("SO").

### Filing Requirements for SO Application

An SO Application is not complete until the Division of Reclamation, Mining and Safety ("Division") has received each of the six items listed below. The Board has authorized the Division to review SO Applications and to issue approvals and denials based on its review. The Division will not review incomplete Applications.

- 1) **Application Form:** An Application Form is included in this Application Packet. Please note that the Application Form must be fully completed, and must bear the original notarized signature of an authorized representative of BOTH the Permittee and the Prospective Successor.
- 2) **Application Fee:** If an Application concerns a Hard Rock or Designated Mining Operation, then a filing fee of \$115.00 must be submitted to the Division. *See* C.R.S. § 34-32-127(2)(a)(I)(L). If an Application concerns a Construction Materials operation, then a filing fee of \$144.00 must be submitted to the Division. *See* C.R.S. § 34-32.5-125(1)(a)(X). Make all checks payable to the "Colorado Division of Reclamation, Mining and Safety."

- 3) **Performance Warranty Form:** The party wishing to become Successor (“Prospective Successor”) must agree to assume all liability for the reclamation of affected land, and must provide a Performance Warranty covering the same. *See* C.R.S. §§ 34-32-119 and 34-32.5-119. A Performance Warranty Form is included in this Application Packet. The Performance Warranty Form must bear the original notarized signature of an authorized representative of the Prospective Successor.
- 4) **Financial Warranty:** The Prospective Successor must provide Financial Warranties sufficient to cover the cost of completing reclamation in compliance with the Permit, the applicable Act and Rules. *See* C.R.S. §§ 34-32-119 and 34-32.5-119. In order to ensure the adequacy of the Financial Warranties, the Division must recalculate the required Financial Warranty whenever it receives an SO Application. Depending upon the state of the operation and the outstanding reclamation work, the Successor may be required to post a higher (sometimes significantly) or lower Financial Warranty than the Permittee currently has in place.

The Division must act on all SO Applications within 30 days. *See* Hard Rock and Construction Materials Rule 1.12.1(2)(a). Since the Division cannot typically review the amount of the required Financial Warranty within this 30-day period, applicants have the following two options:

Applicants may waive their right to receive a decision within 30 days. If the applicants waive their right to a decision within 30 days, the Division will recalculate the required Financial Warranty *before* issuing its decision on the Application. As a result, the Prospective Successor will know, prior to becoming Successor, whether the current Financial Warranty is adequate to cover the reclamation liability, or if the Financial Warranty must be increased. In this case, the Prospective Successor must submit the full Financial Warranty as part of the Application.

Applicants may decide not to waive their right to a decision within 30 days. If the applicants choose not to waive their right to a 30-day review, the Division will review the Financial Warranty *after* issuing its decision on the Application. In this case, the Prospective Successor must submit a conditional replacement Financial Warranty in the amount of the Permittee’s current Financial Warranty as part of the Application.

If the Application is approved, the Division will conduct an inspection within 60 days to assess the amount of the reclamation liability. If the inspection reveals that the reclamation liability exceeds the amount of the conditional replacement Financial Warranty, the Successor must submit the difference within sixty days. Failure to meet this deadline may result in an enforcement action. If the inspection reveals that the reclamation liability is less than the conditional replacement Financial Warranty, the Successor may request a Financial Warranty reduction for release of the difference.

*It is the applicants' right to receive a decision on their complete Application within 30 days. The applicants are free to choose whichever option they decide is best. Permittee and Prospective Successor must designate their decision on the attached Application Form.*

- 5) **Demonstration of Legal Right to Enter:** All Permittees must provide a description of the basis for legal right of entry to the site and to conduct mining and reclamation. *See* Hard Rock and Construction Materials Rules 6.3.7 and 6.4.14. To comply with this requirement, the Prospective Successor must demonstrate that he/she/it has obtained a legal right of entry from any and all surface and mineral rights owners in the affected lands, independent of the current Permittee. *See* Hard Rock and Construction Materials Rules 6.3.7, 6.4.14, and 1.6.2(1)(e)(i). This may be a copy of an access lease, deed, abstract of title, current tax receipt, or a signed and notarized statement by the property owners stating that the Prospective Successor has a legal right to enter. *See* Hard Rock and Construction Materials Rule 6.3.7.
- 6) **Structure Agreements:** In many cases, operators must provide the Division copies of agreements to compensate the owners of any significant, valuable, and permanent man-made structures and utilities within 200 feet of the affected land ("Structure Agreements"). *See* Hard Rock Rules 6.3.12 and 6.4.20; Construction Materials Rules 6.3.12 and 6.4.19. If the Permittee was required to provide Structure Agreements, the Prospective Successor must obtain *new* Structure Agreements from each owner and provide copies of the same to the Division with the Application.

### **Application Review Process**

The Division will grant an Application if it finds that all required information has been submitted, that the Prospective Successor is capable of assuming all responsibility for original permit by virtue of acceptable performance and Financial Warranties, and that the Prospective Successor has no outstanding violations. *See* C.R.S. §§ 34-32-119 and 34-32.5-119. If the Division does not act within 30 days from the date that a complete Application has been filed, the Application will be considered automatically approved. *See* Hard Rock and Construction Materials Rule 1.12.1(2). If an Application is denied, the Division will notify the Permittee and Prospective Successor no later than 10 days from the date it renders its decision. Both the Permittee and Prospective Successor may appeal a denial of an Application to the Board by submitting a written request for an administrative appeal hearing to the Board within 30 days of final decision date. *See* Hard Rock and Construction Materials Rule 1.4.11.

### **Application Checklist**

- **Application Form:** Complete the form located on page 5.
- **Application Fee:** Include check payable to Colorado Division of Reclamation, Mining and Safety.
- **Performance Warranty:** Complete the form located on page 11.
- **Financial Warranty:** Submit the appropriate Financial Warranties or conditional replacement Financial Warranties using the forms posted on the Division's website (available online at <http://mining.state.co.us/Mineral%20Forms.htm>).
- **Demonstration of Legal Right to Enter:** Identify the owners of all surface and mineral rights, obtain the documentation described above, and submit to the Division.
- **Structure Agreements:** Obtain new Structure Agreements if Permittee had been required to do so.

The above listed Operator provides this warranty to the Board in conjunction with a reclamation Permit to conduct the above described mining operation on certain lands in Colorado. The "Affected Lands" are described in the above listed reclamation Permit, and include any Permit Amendment(s) approved by the Division of Reclamation Mining and Safety ("Division").

The Colorado Mined Land Reclamation Act, C.R.S. 34-32-101 *et seq.* ("Hard Rock Act"), and the Colorado Land Reclamation Act for the Extraction of Construction Materials, C.R.S. 34-32.5-101 *et seq.* ("Construction Materials Act"), both require a permit issued by the Board to include a written promise by the Operator to comply with all requirements of the Hard Rock and Construction Materials Acts (referred to herein together as "Acts").

Through the terms and conditions of this performance warranty and Permit, the Operator agrees to be bound by all requirements of the Acts and all Mineral Rules and Regulations of the Board for Hard Rock, Metal, and Designated Mining Operations (2 C.C.R. 407-1) and all Mineral Rules and Regulations of the Board for the Extraction of Construction Materials (2 C.C.R. 407-4) (referred to herein together as "Rules").

The Operator hereby provides the Board warranties of performance pursuant to C.R.S. 34-32-117(2), (3), and (4)/C.R.S. 34-32.5-117(2), (3), and (4), and promises the Board it will comply with all applicable requirements of the Acts and Rules.

The Operator hereby promises the Board it will comply with all of the terms of the reclamation Permit, including any Permit Amendment(s) approved by the Division. This performance warranty obligation of the Operator shall continue until the Operator's liability is released by the Board.

The Operator promises to be responsible for reclamation costs up to the amount established by the Board and incorporates its financial warranty to this performance warranty. The Operator agrees to maintain a financial warranty (or warranties) in good standing for the reclamation costs for the entire life of the

Permit. The amount of the financial warranty shall be sufficient to assure the completion of reclamation of affected lands if the Division has to complete such reclamation due to forfeiture. If the Board determines the Operator is in default under this performance warranty and the Operator fails to cure such default, the Operator's financial warranty shall be subject to forfeiture pursuant to C.R.S. 34-32-118/34-32.5-118.

This performance warranty by the Operator is perpetual and shall remain in full force and effect until all obligations have been met and all associated financial warranty is released by the Board. Any release of liability in a succession of Operators shall comply with C.R.S. 34-32-119/34-32.5-119.

The provisions hereof shall bind and inure to the benefit of the parties hereto and their successors and assigns.
