To: "Girardi - DNR, Chris" <chris.girardi@state.co.us>

Follow up:

1. More storms are forecasted for the next two days; some may dump rain in the Piedra River basin. Some info indicates the Williams Park area in the South End of Hinsdale County (Upper Piedra basin) may have been hit.
2. I did speak with the ranch foreman, who is actually down in New Mexico yesterday and today and returning tomorrow. He will get the pictures: fairly certain the rain/river has not impacted them.
3. He confirmed that we did resume operations to a limited degree, as we are working only in the existing permit area (including the access road) since the financial warranty has not yet been posted (sent to Sara). However, the increased amount and new forms WERE sent to Denver and should be in her hands (or at least the hands of the mailroom) tomorrow so she can review and hopefully be able to formally approve the expansion.
4. I am including the extension request, as you asked.

Nathan
