

## Adequacy Review #4 Responses

October 28, 2025

1. No vegetation is proposed for Area 5.
2. The vegetation survey now uses the same maps that are in Exhibit E.
3. All maps referenced have the same areas as all other exhibits.
4. All areas match since same maps were used.
5. A vegetation threshold has been added to the vegetation report. This threshold can be used in future inspections for the release of certain areas.
6. Water sampling is still under progress and will send ASAP once received.
7. Concrete replacement was added for area 7 as we discussed in our meeting.
8. 18" surface roughening is proposed and is represented on the plans and takeoff.
9. All maps are signed and dated.
10. All well reference numbers are now provided.
11. Maps have been updated with hatching to provide specific areas to be revegetated.
12. Contour labels have been added to all sheets.
13. Prices are included in Exhibit L
14. Area 16 has been updated with costs as requested.
15. Job hours are added to Exhibit L for the demo, portal closures, and pipe installation as requested.
16. +/- has been added to the table to assist with push grades
  - a. NOTE – 21% has been added to Exhibit L
17. Pricing for weed mitigation has been added to Exhibit L with the number of years and acreages also stated. This is located in Exhibit L – A2-4.
18. The difference in prices for the same activity is a result of location and how much is being completed in one location to accurately estimate the cost.
19. Cost has been provided in Exhibit L .
20. This is the same explanation as the response to question 18.
21. All delineators are removed and no longer apart of the reclamation plan.
22. Please refer to the response for question 18.
23. Price added as requested.
24. Price added as requested.
25. It does include the cost of application to the road since the road is right next to the removal. The driving factors of this cost is to use equipment to drive from stockpile location to the road to spread the material out.
26. Information has been added regarding the removal of electrical lines.
27. Price has been added for monitoring pins as requested.
28. Price has been added for moving material and the typical decompaction/seeding efforts.
29. Price has been removed. Visitor shack is gone.
