Hello, Ben -

Attached is the report from my Friday inspection of the Keenesburg Strip Mine.

If we do not talk soon, have a good Thanksgiving.

Rob

COMMENTS

A partial inspection was conducted by Rob Zuber of DRMS on November 21, 2025. The weather was cloudy and cool (approximately 48 deg F). The ground was dry except for the banks of ponds.

No Coors Energy Company (CEC) representative was present at the inspection. Based on correspondence with CEC before the inspection, they plan to interseed a portion of Area 25 (approximately one-third of it) and a small portion of Area 36 in December 2025. As noted in past Division reports, many areas, including Area 25, were mowed in 2025.

References to areas in this report are based on the map from SL-11 (Bond Release No. 11). The eastern two-thirds of the area within the permit boundary were observed (approximately).

FISH and WILDLIFE – Rule 4.18:

Many birds were seen around the site, including an owl flying near the trees west of Sediment Pond 2.

HYDROLOGIC BALANCE - Rule 4.05

Drainage Control 4.05.1, 4.05.2, 4.05.3; Siltation Structures 4.05.5, 4.05.6; Discharge Structures 4.05.7, 4.05.10; Diversions 4.05.4; Effluent Limits 4.05.2; Ground Water Monitoring 4.05.13; Surface Water Monitoring 4.05.13; Drainage – Acid and Toxic Materials 4.05.8; Impoundments 4.05.6, 4.05.9; Stream Buffer Zones 4.05.18:

Sediment Pond 2 and the Dugout Pond contained no visible water; both ponds have large amounts of vegetation on their bottoms. Neither was discharging during the inspection, and there were no signs that the ponds had discharged recently. No problems were observed.

The ditch along the north boundary, which directs runoff to Sediment Pond 2, appears to be functioning well.

Number of Partial Inspection this Fiscal Year: 2

Number of Complete Inspections this Fiscal Year: 2

GENERAL MINE PLAN COMPLIANCE:

No signs of impacts to adjacent areas were seen at the permit boundaries.

RECLAMATION SUCCESS - Rule 4.15, Rule 3:

No erosion problems were seen on any parcels.

REVEGETATION – Rule 4.15**Vegetative Cover; Timing:**

Across the site, vegetation cover was generally very good in areas that have not been mowed. Particular areas that were observed include Area 33, Area 36, and Area 38.

Other than cheat grass, no State-listed noxious weeds were identified. Many Russian thistle plants, a nuisance species, were seen along the north boundary and near Sediment Pond 2.

SIGNS AND MARKERS – Rule 4.02:

The entrance sign was in place and contained the necessary information. Boundary markers were observed in many locations.

DOCUMENTS RECEIVED - none**OTHER (SPECIFY) - none****ENFORCEMENT ACTIONS/COMPLIANCE**

No enforcement actions were initiated as a result of this inspection, nor are any pending.
