Aug - Monitoring	Cholas	08/26/21	-	-		Water measured at 32.39 in August w/ Interference ~16' - sample could not be obtained (compromised section @ 16-feet became worse in Sept. and won't allow water level indicator equipment to pass)																				
Sept - Monitoring	Cholas	09/30/21	-	-																						

\*TVPH (GRO) and TEPH (DRO) are Pace Analytical Laboratory reportable detection limits (RD'Ls). Numerical values are non-regulatory agency thresholds or associated with clean-up standards

Colorado Code of Regulations (CCR) Water Quality Control Commission (Reg. 41) thresholds are per 2020 revision

(-) indicates data is still in process by the lab

- Indicates analytical that was not analyzed during the date of sampling event

All results are presented in mg/L, unless otherwise noted

Exceedances to laboratory reporting limits are highlighted in yellow. Results below the standard or reporting limit are reported as ND

Exceedances to regulatory thresholds are highlighted in yellow and outlined in red

Recently sampled analytical results are highlighted in blue for easier reference

Laboratory Blank contained concentrations of the same analytes that skewed results above detection limits for samples collected on 11/07/2024. Samples collected on 12/19/24 confirm the previous exceedances are not representative of site conditions

The detection of toluene (J-flag qualifier) in sample UG-1, collected on 8/25/2025, is likely attributable to laboratory contamination. This inference is supported by the Laboratory Blank, which reported a benzene detection with a J-flag qualifier, potentially influencing the toluene results to exceed the detection limit
