COMMENTS

This was a complete inspection by Leigh Simmons of the Division of Reclamation, Mining and Safety (Division). The weather was clear and dry, with some snow on the ground. The gate to the site was locked. There was no mining-related activity at the site, but the site was being used for the storage of equipment and materials for other industrial and commercial activities.

AVAILABILITY OF RECORDS – Rule 5.02.4(1):

Records were available at the Elk Creek Mine office. Details are given at the end of this report.

GENERAL MINE PLAN COMPLIANCE:

There had been no recent changes at the site. The site was secure behind a locked gate. The lower pad was further secured behind a second locked gate and chain link fence. The temporary building was empty. The upper pad continued to be used by Oxbow's tenants for the storage and maintenance of equipment and material. The site was tidy and in good order.
