Subject: Uranium Mining in Northern Colorado

As a native Coloradoan, I am urged to express my strong distaste for the idea of Uranium mining in our community. Many people move to Colorado for its natural beauty, open lands, parks, and outdoor activities. Many more find it very hard to move away for these same reasons. We pride ourselves on having a beautiful land to call our own, one that is not tainted by industrial and chemical waste like so many other areas in our country. Please, please, do not let this happen to Colorado. All scientific facts point to the notion that Uranium mining will destroy local water resources, obliterate the land, and pollute our air irrevocably.

I urge all parties and powers involved to do what is right for our community and our children.

Thank you for your time.

Chris Ernst
