Subject: Uranium Mining

Dear Ms Stanton and Division of Mining,

As a Colorado Citizen opposed to Uranium Mining in our Great State, I encourage the Division of Mining to impose the strictest possible regulations in the drafting of proposed rules regarding HB 1161 and SB 228. This would include, but not limit to:

-Do not weaken groundwater protection standards

-continue to allow public comment for pre-mining approvals and extend to the public and local governments the opportunity to seek administrative review of prospecting and in-situ baseline characterization plan approvals.

It is imperative that our division of mining work to protect our citizens from these outside interests.

Thank you,

Susan Kelly
