RE: May Day Idaho Mine Complex, Permit No. M-1981-185, Technical Revision (TR2), Adequacy Review (1)

Dear Mr. Oser:

On April 10, 2012 the Division of Reclamation, Mining and Safety (Division) received your request for a Technical Revision (TR2) to Permit No. M-1981-185. TR2 addresses plans to stabilize and repair the site access road from CR 124. During review of the material submitted, the Division determined that the following issues of concern shall be adequately addressed before TR2 can be considered for approval.

1. The proposed access road has not previously been addressed in an approved Reclamation Plan. Please address all of the applicable requirements of Rule 6.4.5, as they pertain to the proposed access road work plan.
2. Pursuant to Rule 6.4.6, please ensure that Figure C7.10 (dated April 4, 2012) is revised, as necessary, in order to remain consistent with the reclamation proposed for the access road when developing the above referenced Reclamation Plan.
3. Pursuant to Rule 6.4.12, please provide all of the information necessary for the Division to calculate the costs of reclamation for the access road.
4. The TR2 request states that a finalized access road construction plan will need to be completed by a Structural Engineer. Once available, submit to the Division the finalized plan for Division review and approval.

If you require additional information, have questions or concerns, please contact me at the DRMS Grand Junction Field Office.

Sincerely,

A handwritten signature in blue ink, appearing to read "Dustin Czapla".
