Re: Public Comment on permit application P2012006 - NOI from Gold Hill Minerals, LLC

The commUNITY of Jamestown, CO has absolutely no interest in permitting exploration for gold, silver, or base metals.

Disturbances inherent in hard rock mineral exploration, including noise, light, water, air, and soil pollution, are inconsistent with the lifestyle and values of the Jamestown commUNITY.

By copy of this letter the undersigned ask our governmental representatives (Board of Trustees of Jamestown, Boulder County Commissioners, Boulder County Land Use Department, and the Boulder Ranger District of the USFS) to exercise all diligence to prevent permitting minerals exploration on the properties described in permit application P20120006.

Sincerely,
Harry Hempy
