Washington, DC 20585

APR 25 2012

Mr. Don Coram  
President  
Gold Eagle Mining, Inc.  
P.O. Box 3007  
Montrose, CO 81401

**RECEIVED**

MAY 02 2012

GRAND JUNCTION FIELD OFFICE  
DIVISION OF  
RECLAMATION MINING & SAFETY

Dear Mr. Coram:

The purpose of this letter is to ensure that the Department of Energy (DOE) and the lessees in DOE's Uranium Leasing Program (ULP) comply with the U.S. District Court's February 27, 2012 "Order Granting in Part and Denying in Part Defendants' Motion for Reconsideration" in Colorado Environmental Coalition v. Office of Legacy Management, Civil Action No. 08-cv-01624 (D. Colo.). A copy of that Order is enclosed.

In that Order, the court narrowed the injunction that it had issued in its earlier Order of October 18, 2011. The court amended its injunction to allow "Defendants; other federal, state, or local governmental agencies; and/or the lessees . . . to conduct only those activities on ULMP lands that are absolutely necessary" in four specific categories of activities that are identified in the February 27, 2012 Order at Paragraphs (5) (d) (i) through (iv) (on pages 9-10); and only if DOE provides, for each of those four categories of activities, certain specific notices to the court and to Plaintiffs that are identified in the Order at Paragraphs (5) (e) through (g) (on pages 10-11).

In order to comply with the court's Order that DOE provide the required notices to the court and Plaintiffs before any such activities begin (except in the case of those emergencies and specific maintenance activities identified in the Order at Paragraphs 5 (f) and (g)), it is necessary that the ULP lessees (1) provide advance notice to DOE of all such activities before those activities begin; and then (2) not engage in any such activities until after DOE has informed the lessees that DOE has provided the required notice to the court and Plaintiffs pursuant to the February 27, 2012 Order. In order to ensure compliance with the court's Order, DOE further requests that other non-DOE federal, state, and local governmental agencies issuing directions regarding activities on ULP lands provide DOE notice of any such directions. DOE will make every effort to inform the lessees as quickly as possible that it has provided the required advance notice of the activities to the court and Plaintiffs so that the activities may then proceed.

In the case of those emergencies that are identified in the Order at Paragraph 5 (f) – that are "absolutely necessary to remediate dangers to the public health, safety, and environment on ULMP lands caused by major storm events, acts of vandalism, or land subsidence" – the court ordered DOE to provide notice to the court and Plaintiffs before any such activities begin, if possible, but in any event no later than seven days after such activities began. Therefore, if it is not possible for the lessees and agencies to provide advance notice to DOE of those emergency activities (as requested in the preceding paragraph of this letter), it will be necessary that the

activities (as requested in the preceding paragraph of this letter), it will be necessary that the lessees and agencies provide notice to DOE of all such emergency activities within two days after such activities began, so that DOE will be able to provide the required notice to the court and Plaintiffs within seven days after such activities began.

In addition, in the case of those specific maintenance activities that are identified in the Order at Paragraph 5(g) and that are absolutely necessary, the court ordered DOE to provide Plaintiffs with bi-monthly summaries of such activities that have been conducted. For those specific maintenance activities that the lessees consider to be absolutely necessary, DOE directs the lessees to provide notification and a detailed description to DOE before they begin any of those maintenance activities (except those activities that qualify as emergencies); DOE will then inform the lessees whether the agency agrees that those activities are permitted by Paragraph 5(g), so that the lessees will then be able to begin those activities in compliance with the Order. This process is necessary in order to ensure that before DOE provides the required bi-monthly summaries of activities to the Plaintiffs, DOE will have already confirmed that those activities are permitted by the Order. After the lessees provide notification and a detailed description of those routine maintenance activities to DOE, DOE will make every effort to inform the lessees, within two working days, whether the agency agrees that those activities are permitted by Paragraph 5(g).

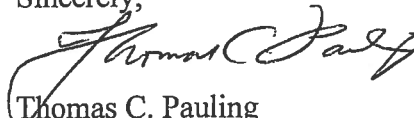

In all of the cases described above, lessee notification should be made to DOE in writing by electronic e-mail to the following address:

LMULPNOTICE@hq.doe.gov

If the activities involve directions issued by non-DOE federal, state, or local governmental agencies, copies of those directions should be scanned and sent as e-mail attachments to the e-mail address listed above.

Thank you for your cooperation in this matter. Please contact Laura Kilpatrick at 720-880-4338 with any questions.

Sincerely,

Thomas C. Pauling  
Director of Site Operations  
Office of Legacy Management

**ORDER GRANTING IN PART AND DENYING IN PART  
DEFENDANTS' MOTION FOR RECONSIDERATION**

---

This matter is before the Court on Defendants' Motion to Reopen and for Reconsideration of October 18, 2011 Order. (ECF No. 95.) Plaintiffs have filed a Response to the Motion (ECF No. 100), and Defendants have filed a Reply (ECF No. 101). The Court hereby REOPENS this action for the limited purpose of ruling on Defendants' Motion for Reconsideration. See D.C.COLO.LCivR 41.2. Having carefully considered the arguments presented, Defendants' Motion for Reconsideration is GRANTED IN PART and DENIED IN PART.

**I. BACKGROUND**

The Uranium Lease Management Program ("ULMP") is a uranium mining program administered by Defendants in the Uravan Mineral Belt in Mesa, Montrose, and

San Miguel Counties in southwestern Colorado. Plaintiffs brought this action to challenge (1) Defendants' 2007 decision to expand the ULMP, (2) Defendants' issuance of leases to uranium mining companies under the expanded ULMP, and (3) Defendants' approvals of exploration or reclamation activities on certain lease tracts.

The Court, in its October 18, 2011 Opinion and Order, held that Defendants' 2007 Environmental Assessment ("EA") and Finding of No Significant Impact ("FONSI") approving the expansion of the ULMP violated the National Environmental Policy Act ("NEPA") and Endangered Species Act ("ESA"). (ECF No. 94.) As a result, the Court invalidated the EA and FONSI, ordered Defendants to conduct a NEPA- and ESA-compliant environmental analysis on remand, stayed the leases already issued by Defendants, enjoined Defendants from issuing any new leases on ULMP lands, and enjoined Defendants "from approving any activities on lands governed by the ULMP, including exploration, drilling, mining, and reclamation activities" (collectively, the "Injunction"). (*Id.* at 52.)

## **II. ANALYSIS**

### **A. Parties' Arguments**

In their Motion for Reconsideration (the "Motion"), brought under Federal Rule of Civil Procedure 59(e), Defendants argue that:

- (1) the Injunction is not warranted and constitutes manifest legal error;
- (2) the Court should reconsider the Injunction given that Defendants have conducted further steps in completing an Environmental Impact Statement ("EIS"); and
- (3) the Court should at least modify the Injunction to allow:

- (a) activities on ULMP lands that are necessary to complete the EIS;
- (b) activities on ULMP lands that are required to comply with orders from government regulatory agencies; and
- (c) certain reclamation activities on ULMP lands.

In response, Plaintiffs argue that the Motion should be denied because Defendants failed to meaningfully confer with Plaintiffs prior to filing the Motion, and because none of the relief sought is warranted.

#### **B. Legal Standard**

"A Rule 59(e) motion to alter or amend the judgment should be granted only to correct manifest errors of law or to present newly discovered evidence." *Phelps v. Hamilton*, 122 F.3d 1309, 1324 (10th Cir. 1997) (quotation marks omitted); *see also Servants of Paraclete v. Does*, 204 F.3d 1005, 1012 (10th Cir. 2000) ("Grounds warranting a motion to reconsider include (1) an intervening change in the controlling law, (2) new evidence previously unavailable, and (3) the need to correct clear error or prevent manifest injustice.").

#### **C. Discussion**

##### **1. Meet-and-confer requirement**

Plaintiffs argue that the Motion should be denied because Defendants failed to meaningfully meet and confer prior to filing the Motion. The Court agrees that Defendants' counsel's last minute efforts to meet and confer on the day of the deadline to file a timely Rule 59(e) motion were inadequate. However, under the unique circumstances present here, in combination – namely, (1) counsel for Defendants did

make three attempts to contact counsel for Plaintiffs on the day of the deadline, but counsel for Plaintiffs did not respond until very late in the afternoon and then proposed meeting and conferring the next day, (2) the 28-day deadline to file a motion under Rule 59(e) is jurisdictional, and (3) the primary relief sought by Defendants is complete dissolution of the injunction, which makes the Motion comparable to a potentially dispositive motion, which is not subject to the meet and confer requirement under D.C.COLO.LCivR 7.1A. The Court accordingly declines to deny the Motion on this ground.

**2. Whether the Court Committed Legal Error by Issuing the Injunction**

Defendants first argue that the Injunction was not warranted because the Court failed to adequately evaluate the governing factors from *Monsanto Co. v. Geertson Seed Farms*, 130 S. Ct. 2743, 2756 (2010), and in particular the requirement of irreparable harm. (ECF No. 95, at 5-7.) The Court disagrees. The Court carefully considered the *Monsanto* factors, applied them to the facts, and found the requisite irreparable harm. (ECF No. 94, at 49-50.) The Court did not clearly err in reaching this conclusion. Therefore, the Court denies the Motion as to this argument.

**3. Further Steps in Completing EIS**

Defendants also emphasize that they have completed significant new steps in working on an EIS, including creating a draft schedule for the EIS's completion. (ECF No. 95, at 7-10.) Defendants made similar arguments to the Court in their original Response brief, in which they argued that this action was prudentially moot because of Defendants' plan to create an EIS. The Court rejected those arguments, finding

numerous reasons why the action was not prudentially moot. (ECF No. 94, at 11-15.)

Although the Court emphasized in its Order that Defendants had not even yet created a timetable for the completion of the EIS, the fact that a draft schedule has now been created does not change the Court's conclusion, given all the other reasons expressed by the Court for why the action was not prudentially moot.

**4. Activities Necessary to Complete EIS**

Defendants also seek clarification of the Court's Order regarding activities on ULMP lands that are necessary to complete the EIS. (ECF No. 95, at 10-12.) The Court recognizes that its injunction prohibiting "any activities on lands governed by the ULMP" is broad, and there is good cause to amend that portion of the Injunction. (ECF No. 94, at 52.) Therefore, as ordered below, the Injunction will be amended to allow those activities on ULMP lands that are absolutely necessary to conduct an environmental analysis on remand regarding the ULMP that fully complies with NEPA, ESA, all other governing statutes and regulations, and this Court's October 18, 2011 Opinion and Order. As proposed by Defendants, the Court will require Defendants "to provide notice to the Court and Plaintiffs . . . before any such activities beg[i]n . . . on the [ULMP] lands." (ECF No. 101, at 3.)

**5. Activities Necessary to Comply With Orders From State Regulatory Agencies**

Defendants also seek clarification regarding activities on ULMP lands that are necessary to comply with orders of government regulatory agencies. (ECF No. 95, at 14-15.) They point out that the Colorado Division of Reclamation, Mining and Safety has already ordered two lessees to prepare an Environmental Protection Plan, and that

activities on ULMP lands may be necessary to comply with that Order. Although this issue is to some degree not yet ripe, the Court finds good cause to modify the injunction to allow those activities on ULMP lands that are absolutely necessary to comply with an order from a federal, state, or local government regulatory agency. As to these actions also, the Court will require Defendants to provide notice to the Court and Plaintiffs before any such activities begin on ULMP lands.

#### **6. Reclamation Activities**

Defendants also contend that they should be allowed to conduct certain reclamation activities on the ULMP lands. While Defendants' Motion and supporting documents did not provide enough detail to the Court to adequately analyze this request, Defendants' Reply brief and the accompanying Declaration of Steven R. Schiesswohl does.

The Court finds good cause to amend the Injunction to allow certain reclamation activities on ULMP lands. Specifically, the Court will amend the injunction to allow those activities on ULMP lands that are absolutely necessary to remediate dangers to the public health, safety, and environment on ULMP lands caused by major storm events, acts of vandalism, or land subsistence. (See ECF No. 101-1, ¶ 6.) As to these actions, the Court will require Defendants to provide notice to the Court and Plaintiffs before any such activities begin, if possible. However, if an emergency situation prevents Defendants from providing such notice before such activities begin, Defendants shall provide notice to the Court and Plaintiffs of such response activities no later than seven days after the activities began.

The Court will also amend the injunction to allow those activities on ULMP lands

that are absolutely necessary to maintain access roads; maintain safety berms and stormwater run-off control berms associated with existing mine dumps and mine yard facilities; maintain security fences and gates to limit public access to potentially hazardous areas; conduct inspections of existing mines to maintain safe access to mine workings; conduct environmental sampling of existing monitoring wells, and air sampling of exhaust air from existing mines; perform weed control of non-native noxious weeds; perform vegetation control around existing mine portal and vent hole openings to minimize fire potential; or maintain and repair mine equipment at existing mine yard facilities. As to these actions, the Court will not require Defendants to provide notice before conducting such activities, but will require Defendants to provide Plaintiffs (but not the Court) with bi-monthly (every 60 days) summaries of such activities that have been conducted.

Defendants will not be allowed to close or gate open mine portals, close mine shafts, or close mine vents, unless ordered to do so by a federal, state, or local government regulatory agency.

### **III. CONCLUSION**

In accordance with the foregoing, the Court ORDERS as follows:

- (1) This action is REOPENED for the limited purpose of ruling on Defendants' Motion for Reconsideration;
- (2) Defendants' Motion for Reconsideration (ECF No. 95) is GRANTED IN PART and DENIED IN PART;
- (3) Defendants' Motion for Reconsideration is GRANTED in so far as the Court's injunction will be amended to allow Defendants; other federal,

state, or local governmental agencies; and/or the lessees to conduct only those activities on ULMP lands that are absolutely necessary:

- (a) to conduct an environmental analysis regarding the ULMP that fully complies with NEPA, ESA, all other governing statutes and regulations, and this Court's October 18, 2011 Opinion and Order;
  - (b) to comply with orders from federal, state, or local government regulatory agencies;
  - (c) to remediate dangers to the public health, safety, and environment on ULMP lands caused by major storm events, acts of vandalism, or land subsistence; and
  - (d) to maintain access roads; maintain safety berms and stormwater run-off control berms associated with existing mine dumps and mine yard facilities; maintain security fences and gates to limit public access to potentially hazardous areas; conduct inspections of existing mines to maintain safe access to mine workings; conduct environmental sampling of existing monitoring wells, and air sampling of exhaust air from existing mines; perform weed control of non-native noxious weeds; perform vegetation control around existing mine portal and vent hole openings to minimize fire potential; or maintain and repair mine equipment at existing mine yard facilities.
- (4) In all other respects, Defendants' Motion for Reconsideration is DENIED;
  - (5) As amended by this Order, this Court's ongoing injunction consists of the

following provisions:

- (a) Defendants' 2007 EA and FONSI are invalidated and have no further legal or practical effect;
- (b) The 31 leases currently in existence under the ULMP are stayed;
- (c) Defendants are enjoined from issuing any new leases on lands governed by the ULMP;
- (d) Defendants are enjoined from approving any activities on lands governed by the ULMP, including exploration, drilling, mining, and reclamation activities, except that Defendants; other federal, state, or local governmental agencies; and/or the lessees are allowed to conduct only those activities on ULMP lands that are absolutely necessary:
  - (i) to conduct an environmental analysis on remand regarding the ULMP that fully complies with NEPA, ESA, all other governing statutes and regulations, and this Court's October 18, 2011 Opinion and Order;
  - (ii) to comply with orders from federal, state, or local government regulatory agencies;
  - (iii) to remediate dangers to the public health, safety, and environment on ULMP lands caused by major storm events, acts of vandalism, or land subsistence; and
  - (iv) to maintain access roads; maintain safety berms and stormwater run-off control berms associated with existing

mine dumps and mine yard facilities; maintain security fences and gates to limit public access to potentially hazardous areas; conduct inspections of existing mines to maintain safe access to mine workings; conduct environmental sampling of existing monitoring wells, and air sampling of exhaust air from existing mines; perform weed control of non-native noxious weeds; perform vegetation control around existing mine portal and vent hole openings to minimize fire potential; or maintain and repair mine equipment at existing mine yard facilities.

- (e) If Defendants plan to conduct activities that are absolutely necessary to complete the EIS or to comply with orders from federal, state, or local government regulatory agencies, the Court orders Defendants to provide notice to the Court and Plaintiffs before any such activities begin;
- (f) If Defendants plan to conduct activities that are absolutely necessary to remediate dangers to the public health, safety, and environment on ULMP lands caused by major storm events, acts of vandalism, or land subsidence, the Court orders Defendants to provide notice to the Court and Plaintiffs before any such activities begin, if possible, but in any event shall be provided to the Court and Plaintiffs no later than seven days after such activities began;
- (g) If Defendants plan to conduct activities that are absolutely

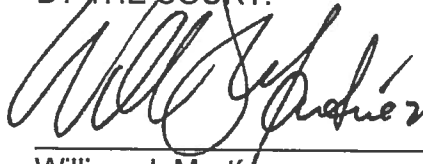

necessary to maintain access roads; maintain safety berms and stormwater run-off control berms associated with existing mine dumps and mine yard facilities; maintain security fences and gates to limit public access to potentially hazardous areas; conduct inspections of existing mines to maintain safe access to mine workings; conduct environmental sampling of existing monitoring wells, and air sampling of exhaust air from existing mines; perform weed control of non-native noxious weeds; perform vegetation control around existing mine portal and vent hole openings to minimize fire potential; or maintain and repair mine equipment at existing mine yard facilities, the Court orders Defendants to provide Plaintiffs (but not the Court) with bi-monthly summaries of such activities that have been conducted;

- (h) After Defendants conduct an environmental analysis on remand that fully complies with NEPA, ESA, all other governing statutes and regulations, and this Court's October 18, 2011 Opinion and Order, Defendants may move the Court to dissolve this injunction;
- (6) If, at any point in the future, Plaintiffs or Defendants contemplate filing a motion for reconsideration under Federal Rule of Civil Procedure 60(b) (which the Court discourages), or Defendants contemplate filing a motion to dissolve the injunction following completion of their new environmental analysis, they shall first fully and meaningfully meet and confer with opposing counsel pursuant to D.C.COLO.LCivR 7.1A.

- (7) After entry of this Order, the Clerk of Court shall again administratively CLOSE this action, subject to the Court's continuing jurisdiction to enforce full compliance with this Order.

Dated this 27<sup>th</sup> day of February, 2012.
