Re: Identification numbers and proposed prospecting map.

Dear Mr. Oswald,

Thank you for your letter stating the status of our checks and for your patience while we work out the proposed prospecting plan. Enclosed is a map showing our proposed prospecting plan as well as our state identification number for Colorado Mining and Exploration LLC.

Our Identification number for Colorado Mining and Exploration LLC is 20121344442. The state does now have this on file and it is available on their web site.

Please find the following information sufficient for your request on our proposed prospecting.

We will be opening up two existing portals on the property that are half open in their current state. After we are finished exploring these potential future portals we will completely seal them off with large boulders and some of the existing loose rock in the pit. The disturbed area of these portals should be no more than 20' x 20'.

We are planning on digging a sampling pit in the bottom of the existing Mine pit. It will be approximately 200' long by 100' wide and 60' deep with a 1 to 1 slope on the side walls. The material will be set just adjacent to the pit and pushed back in and reclaimed after the sampling program is finished.

We are also planning on digging three test pits to check the depth of overburden on the pit side walls. They will be roughly 10' wide by 20' long and 20' deep. The rock that is pulled from these test pits will be set adjacent to the test holes and back filled and reclaimed after digging them and sampling them.

All material on this project will be set aside and replaced in its original location after we have explored and thoroughly sampled each spot. Any top soil will be set aside and reused as top soil in any place where there may be some top soil that is disturbed.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jake Wilkinson". The signature is fluid and cursive, with the first name "Jake" written in a larger, more prominent script than the last name "Wilkinson".
