### **OBSERVATIONS**

This inspection was conducted as part of the normal program established by the Colorado Division of Reclamation, Mining and Safety. The North Clear Creek Construction Materials Mine is a 110c permitted site located approximately 15 miles north of Debeque, Colorado on Clear Creek Road. Julie Justus of Chevron North America Exploration and Production was present during the inspection.

The mine identification sign and permit boundary markers were in place and in compliance with rule 3.1.12. The sign is located at the main entrance to the gravel mine. Permit boundary markers were comprised of fence posts that were evenly spaced and easily identified along the perimeter permit boundary.

Various pieces of heavy equipment were located within the permit area. The mine was inactive during the inspection. It appeared that only 2-3 acres of reserve material remains.

No weeds were observed within the permit area during the inspection.

No problems or violations were observed during the inspection.

Responses to this inspection report should be directed to Travis Marshall at the Division of Reclamation, Mining and Safety, Grand Junction Field Office, 101 South 3<sup>rd</sup> Street, Room 301, Grand Junction, Colorado 81501, phone no. 970-241-2042.
