Subject: RE: Modification comment

Dear Ms. Hawlee,

Thank you for the comments you submitted on July 30, 2012 regarding the Black Range Minerals prospecting permit modification (P-2009-025, MD-02). The DRMS is conducting a review of the modification in accordance with Rule 5 of The Mineral Rules and Regulations of The Colorado Mined Land Reclamation Board for Hard Rock, Metal, and Designated Mining Operations. Should the DRMS find any deficiencies in the MD-02 application, the prospector will have 60 days from the date the prospector is notified by the DRMS of those deficiencies to address them.

As a person who filed a timely comment, you will receive a copy of the decision letter. Pursuant to Rule 5.1.3(d)(II), should you wish to appeal the determination made by the Office, you will have five (5) business days from the date the Office sends its notice in which to file such an appeal.

If you have any questions, please contact me.

Subject: Modification comment

Dear Mr. Cazier, Mr. King and Ms. Pineda,
Please find my comments attached regarding Black Range Minerals (BLR) communication to DRMS regarding Monitoring wells.

I send this email to all three of you because I believe that the type of mining BLR intends to use has **no current regulations**.

I respectfully request a reply as to how this type of mining would be regulated.

And an answer as to whether or not at this stage it would fall under the ISL rule 1.4.3 for pre-application requirements?

Thank you for your time.
Kay Hawlee
