Subject: Extension of time request for DLR Information request

Attachments: TR1Adequacy001.pdf

Good morning Dustin,

After speaking to you on the phone this morning about our map research and update, I stated we are currently working with surveyors to get a more accurate map rather than the existing hand drafted maps that do not represent a true scale or alignment. This will take additional time to complete, and you advised requesting a time extension. It is our intention to expedite the information you are requesting.

Aspen Mineral Resources Inc. is requesting a time extension from the current Friday Aug. 10th due date to Friday Aug 31st, 2012 to assemble the proper information requested in your letter dated July, 27, 2012: (attached)

RE: Sooner Lucky Strike Mine Ltd, File No. M-1982-020, Technical Revision (TRI) Request, Adequacy Review

1. Authorization of John McGrath by Aspen Mineral Resources Inc. to request permit revisions
2. Owners Statement to Rule 3.1.11
3. Permitted land map update
4. (Not on Letter – but discussed on previous call) Chemical List for Lucky Strike Mill

Respectfully submitted,

John McGrath

VP Operations
