OBSERVATIONS

This inspection was conducted as part of the Division of Reclamation, Mining and Safety's (Division) normal monitoring program. Bob Gilley and Rodney Due, representing the Operator, were present during this inspection. Photographs are included with this report in order to illustrate some of the conditions observed.

The Mountain View Pit is located on the south side of the town of Crested Butte and accessed from a dirt road which begins at the intersection of Red Lady and 9th streets. The site is a 110c operation that includes a total of 9.1 permitted acres. The Division does not hold a financial warranty for this site.

Adequate mine identification signage was noted at the entrance to the site.

The affected area was marked by survey lathe that was clearly visible and adequate to delineate the affected area boundary.

Highwall stabilization efforts had been completed along the south side of the permit area. The highwall had been graded and seeded. Little topsoil exists at the site, but vegetation is beginning to establish itself. The slope appeared stable with no erosion features noted. At the base of the highwall is a flat, gravelled bench area.

Noxious weeds were not observed.

No problems or violations were noted during this inspection.

Responses to this inspection report should be directed to Dustin Czapla at the Division of Reclamation, Mining and Safety, Grand Junction Field Office, 101 South 3rd Street, Room 301, Grand Junction, Colorado 81501, phone number (970) 243-6299.
