GRAND JUNCTION FIELD OFFICE
DIVISION OF
RECLAMATION MINING & SAFETY

RE: Garnet Mesa Investments, LLC, Warren Pit Application, File No. M-2012-024, Amendment 1

Dear Mr. Marshall:

We are submitting the amendment to the above application to include land for the new haul road. This road was relocated ¼ mile north of the previously designated haul road and will need to be constructed in the 40 foot strip being added to the permit area. The strip was widened to 80 feet by 80 feet at the west end to build an adequate turn radius. This submittal includes the application forms and revised exhibits D-Mining Plan, E- Reclamation Plan and S-Permanent Man-made Structures. All other exhibits are unchanged by this amendment. I will get the first publication in the August 29 edition of the Delta County Independent if you approve. I believe this will put the end of the comment period on October 9. Please call me and let me know if we are good to publish or not.

Thank you for your assistance in this matter.

Sincerely,

Michael Ripp
Consultant

CHECK ONE: ☒ There is a File Number Already Assigned to this Operation

Permit # M - 2012 - 024 (Please reference the file number currently assigned to this operation)
☐ New Application (Rule 1.4.5) ☒ Amendment Application (Rule 1.10)
☐ Conversion Application (Rule 1.11)

Permit # M - 2012 - 024 (provide for Amendments and Conversions of existing permits)

The application for a Construction Materials Regular 112 Operation Reclamation Permit contains three major parts: (1) the application form; (2) Exhibits A-S, Addendum 1, any sections of Exhibit 6.5 (Geotechnical Stability Exhibit; and (3) the application fee. When you submit your application, be sure to include one (1) complete signed and notarized ORIGINAL and one (1) copy of the completed application form, two (2) copies of Exhibits A-S, Addendum 1, appropriate sections of 6.5 (Geotechnical Stability Exhibit, and a check for the application fee described under Section (4) below. Exhibits should NOT be bound or in a 3-ring binder; maps should be folded to 8 1/2" X 11" or 8 1/2" X 14" size. To expedite processing, please provide the information in the format and order described in this form.

GENERAL OPERATION INFORMATION

Type or print clearly, in the space provided, ALL information requested below.

1. Applicant/operator or company name (name to be used on permit): Garnet Mesa Investments, LLC

1.1 Type of organization (corporation, partnership, etc.): Partnership

2. Operation name (plc, mine or site name): Warren Gravel Pit

3. Permitted acreage (new or existing site):

3.1 Change in acreage (+)	<u>40.44</u>	permitted acres
	<u>1.25</u>	acres
3.2 Total acreage in Permit area	<u>41.69</u>	acres

4. Fees:

4.1 New Application	<u>\$2,696.00</u>	application fee
4.2 New Quarry Application	<u>\$3,342.00</u>	quarry application
4.4 Amendment Fee	<u>\$2,229.00</u>	amendment fee
4.5 Conversion to 112 operation (set by statute)	<u>\$2,696.00</u>	conversion fee

5. Primary commodity(s) to be mined: gravel Sand

5.1 Incidental commodity(s) to be mined:	1. <u>overburden</u> - <u>15,000</u> <u>lbs/Tons/Yr</u>	2. <u>topsoil</u> / <u>1,200</u> <u>lbs/Tons/Yr</u>
	3. <u>/</u> <u>lbs/Tons/Yr</u>	4. <u>/</u> <u>lbs/Tons/Yr</u>
		5. <u>/</u> <u>lbs/Tons/Yr</u>
5.2 Anticipated end use of primary commodity(s) to be mined:	<u>Construction aggregate</u>	
5.3 Anticipated end use of incidental commodity(s) to be mined:	<u>fill, vegetation</u>	

6. Name of owner of subsurface rights of affected land: Garnet Mesa Investments, LLC
If 2 or more owners, "refer to Exhibit O".

7. Name of owner of surface of affected land: Garnet Mesa Investments, LLC

8. Type of mining operation: ☒ Surface ☐ Underground

15. On Site Processing: ☒ Crushing/Screening

13.1 Briefly explain mining method (e.g. truck/shovel): Material will be crushed, screened and stockpiled by conveyor or front-end loader till shipped to customers.

List any designated chemicals or acid-producing materials to be used or stored within permit area: Diesel, gasoline, hydraulic oil, and grease.

16. Description of Amendment or Conversion:

If you are amending or converting an existing operation, provide a brief narrative describing the proposed change(s).

This amendment adds 1.25 acres to the previously submitted application for 40.44 acres for the Warren Gravel Pit. This added land will allow the operator to build a new haul road within the permitted acres. All other aspects of the existing application remain as submitted.

Maps and Exhibits:

Two (2) complete, unbound application packages must be submitted. One complete application package consists of a signed application form and the set of maps and exhibits referenced below as Exhibits A-S, Addendum 1, and the Geotechnical Stability Exhibit. Each exhibit within the application must be presented as a separate section. Begin each exhibit on a new page. Pages should be numbered consecutively for ease of reference. If separate documents are used as appendices, please reference these by name in the exhibit.

With each of the two (2) signed application forms, you must submit a corresponding set of the maps and exhibits as described in the following references to Rule 6.4, 6.5, and 1.6.2(1)(b):

EXHIBIT A	Legal Description
EXHIBIT B	Index Map
EXHIBIT C	Pre-Mining and Mining Plan Map(s) of Affected Lands
EXHIBIT D	Mining Plan
EXHIBIT E	Reclamation Plan
EXHIBIT F	Reclamation Plan Map
EXHIBIT G	Water Information
EXHIBIT H	Wildlife Information
EXHIBIT I	Soils Information
EXHIBIT J	Vegetation Information
EXHIBIT K	Climate Information
EXHIBIT L	Reclamation Costs
EXHIBIT M	Other Permits and Licenses
EXHIBIT N	Source of Legal Right-To-Enter
EXHIBIT O	Owners of Record of Affected Land (Surface Area) and Owners of Substance to be Mined
EXHIBIT P	Municipalities Within Two Miles
EXHIBIT Q	Proof of Mailing of Notices to County Commissioners and Conservation District
EXHIBIT R	Proof of Filing with County Clerk or Recorder
EXHIBIT S	Permanent Man-Made Structures
Rule 1.6.2(1)(b)	ADDENDUM 1 - Notice Requirements (sample enclosed)
Rule 6.5	Geotechnical Stability Exhibit (any required sections)

The instructions for preparing Exhibits A-S, Addendum 1, and Geotechnical Stability Exhibit are specified under Rule 6.4 and 6.5 and Rule 1.6.2(1)(b) of the Rules and Regulations. If you have any questions on preparing the Exhibits or content of the information required, or would like to schedule a pre-application meeting you may contact the Office at 303-866-3567.

Responsibilities as a Permittee:

Upon application approval and permit issuance, this application becomes a legally binding document. Therefore, there are a number of important requirements which you, as a permittee, should fully understand. These requirements are listed below. Please read and initial each requirement, in the space provided, to acknowledge that you understand your obligations. If you do not understand these obligations then please contact this Office for a full explanation.

 1. Your obligation to reclaim the site is not limited to the amount of the financial warranty. You assume legal liability for all reasonable expenses which the Board or the Office may incur to reclaim the affected lands associated with your mining operation in the event your permit is revoked and financial warranty is forfeited;

 2. The Board may suspend or revoke this permit, or assess a civil penalty, upon a finding that the permittee violated the terms or conditions of this permit, the Act, the Mineral Rules and Regulations, or that information contained in the application or your permit misrepresent important material facts;

 3. If your mining and reclamation operations affect areas beyond the boundaries of an approved permit boundary, substantial civil penalties, to you as permittee can result;

 4. Any modification to the approved mining and reclamation plan from those described in your approved application requires you to submit a permit modification and obtain approval from the Board or Office;

 5. It is your responsibility to notify the Office of any changes in your address or phone number;

 6. Upon permit issuance and prior to beginning on-site mining activity, you must post a sign at the entrance of the mine site, which shall be clearly visible from the access road, with the following information (Rule 3.1.12):

a. the name of the operator;

b. a statement that a reclamation permit for the operation has been issued by the Colorado Mined Land Reclamation Board; and,

c. the permit number.

 7. The boundaries of the permit boundary area must be marked by monuments or other markers that are clearly visible and adequate to delineate such boundaries prior to site disturbance.

 8. It is a provision of this permit that the operations will be conducted in accordance with the terms and conditions listed in your application, as well as with the provisions of the Act and the Construction Material Rules and Regulations in effect at the time the permit is issued.

 9. Annually, on the anniversary date of permit issuance, you must submit an annual fee as specified by Statute, and an annual report which includes a map describing the acreage affected and the acreage reclaimed to date (if there are changes from the previous year), any monitoring required by the Reclamation Plan to be submitted annually on the anniversary date of the permit approval. Annual fees are for the previous year a permit is held. For example, a permit with the anniversary date of July 1, 1995, the annual fee is for the period of July 1, 1994 through June 30, 1995. Failure to submit your annual fee and report by the permit anniversary date may result in a civil penalty, revocation of your permit, and forfeiture of your financial warranty. It is your responsibility, as the permittee, to continue to pay your annual fee to the Office until the Board releases you from your total reclamation responsibility.

 10. For joint venture/partnership operators: the signing representative is authorized to sign this document and a power of attorney (provided by the partner(s)) authorizing the signature of the representative is attached to this application.

NOTE TO COMMENTORS/OBJECTORS:

It is likely there will be additions, changes, and deletions to this document prior to final decision by the Office. Therefore, if you have any comments or concerns you must contact the applicant or the Office prior to the decision date so that you will know what changes may have been made to the application document.

The Office is not allowed to consider comments, unless they are written, and received prior to the end of the public comment period. You should contact the applicant for the final date of the public comment period.

If you have questions about the Mined Land Reclamation Board and Office's review and decision or appeals process, you may contact the Office at (303) 866-3567.

Certification:

As an authorized representative of the applicant, I hereby certify that the operation described has met the minimum requirements of the following terms and conditions:

1. To the best of my knowledge, all significant valuable and permanent man-made structure(s) in existence at the time this application is filed, and located within 200 feet of the proposed affected area have been identified in this application (Section 34-32.5-115(4)(e), C.R.S.).
2. No mining operation will be located on lands where such operations are prohibited by law (Section 34-32.5-115(4)(f), C.R.S.;
3. As the applicant/operator, I do not have any extraction/exploration operations in the State of Colorado currently in violation of the provisions of the Colorado Land Reclamation Act for the Extraction of Construction Materials (Section 34-32.5-120, C.R.S.) as determined through a Board finding.
4. I understand that statements in the application are being made under penalty of perjury and that false statements made herein are punishable as a Class 1 misdemeanor pursuant to Section 18-8-503, C.R.S.

This form has been approved by the Mined Land Reclamation Board pursuant to section 34-32.5-112, C.R.S., of the Colorado Land Reclamation Act for the Extraction of Construction Materials. Any alteration or modification of this form shall result in voiding any permit issued on the altered or modified form and subject the operator to cease and desist orders and civil penalties for operating without a permit pursuant to section 34-32.5-123, C.R.S.

Signed and dated this 20 day of August, 2012.

Exhibit D – Mining Plan

This mining permit is for a gravel pit on 41.69 acres owned by Garnet Mesa Investments, LLC. The property is situated about three miles east of the town of Delta, Colorado and 1/2 mile south of the Gunnison River. The land is currently irrigated crop land and has been for many years. Access is from Delta County 1800 Road onto a private farm road owned by the applicant. The existing private road that accesses the site and 1800 Road will be graded and graveled to handle truck traffic. A new access road will be built along the northern boundary of the applicant's property from the private road on the west ¼ mile east to the 40 acre parcel to be mined. The private roads will remain in place for use of the land owner after mining and reclamation of the site is complete.

Mining will begin in the northeast quadrant of the property. The farm road used for access will be improved to handle heavy vehicle traffic and a crossing over the concrete ditch onto the property will be built. Topsoil and overburden will be stripped from the surface of approximately 10 acres and stockpiled in separate piles. Some of the exposed gravel will be used to build the access road described above. One topsoil stockpile will be used to create a berm in the northeast corner to shield the Carver residence from the noise of the operation. The berm will be approximately eight feet high, 48 feet wide and 300 feet long with side slopes between 2.5:1 to 3:1 h:v. Another topsoil and/or overburden stockpile with similar cross section will be built in the southeast corner of the property to shield Homestead Road from visual and noise impacts. Topsoil stockpiles that are not to be disturbed for more than a year will be broadcast with dry land pasture mix to prevent erosion. Excess overburden will be stockpiled along the eastern boundary of the property so that it is out of the way of short term excavations. A 50 foot buffer zone of un-mined land will be maintained along the perimeter of the pit to allow for topsoil stockpiles and access for reclamation operations. Scrapers, front-end loaders and possibly a dozer will be used for this work. Excavation of gravel will be done with excavators, front-end loaders and possible a dozer. As material is removed, the operator will cut slopes to the final 3:1 h:v slope required for final reclamation to 01 feet below the expected water surface when the pond is allowed to fill at the end of mining. Slopes deeper than 10 feet below the water surface may be cut to 2:1. This way reclamation is concurrent with mining and the only slope reduction needed in a bond forfeiture situation are the internal high walls.

A settling pond approximately 25 feet by 100 feet by 2 feet deep will be built along the existing tail water ditch on the north side of the property just west of the center of the permitted area. This settling pond will receive discharge from the de-watering pump once ground water is encountered. When the pit is excavated to full depth in the northeast quadrant, the settling pond and sump will be established in on the pit floor with the clear water discharged to the same tail water ditch, which will carry it to the Gunnison River.

The initial stripping and stockpiling of topsoil and overburden and establishment of the road and the initial settling pond is expected to be accomplished in the first month of operation. Initially, about 10 acres will be stripped to allow room for crushing, screening and stockpiling as well as mining operations. The operator intends to mine the east half of the property while keeping the west half in irrigated crops until sales make it necessary to begin mining the west half. At that time, mining will move west into the northwest quadrant and then south till the property is mined out. The operator anticipates mining 75,000 to 100,000 tons of material per year for approximately 20 years. Economic conditions may significantly alter quantities and time frame.

The deposit fairly clean alluvial gravel from the Gunnison River flood plain and is approximately 25 to 30 feet thick with an overburden and topsoil cover of about 3 to 12 feet with an estimated average of 7.5 feet. There are areas where the cover may be thinner or contain significant amounts of rocky material that makes it less desirable for quality topsoil. The operator commits to retaining enough quality topsoil for anticipated reclamation requirements. This property has been continuously cultivated for many years and it is expected that in less rocky areas, 9 to 15 inches of good topsoil can be salvaged.

Mining Plan –cont.

The stratum underlying the gravel deposit is the Mancos Shale. Mining operations will maintain approximately 2 feet of gravel cover over the shale to avoid oxidation and release of Selenium into the discharge water.

The primary commodities from the mined material will be sand and gravel for construction aggregate. It is possible that portable concrete or asphalt plants may be on site on a temporary basis as specific projects may require. Crushing and screening operations will be sub-contracted to portable plants during the warmer months of April through September. Sales from stockpiled material will continue year round. Dewatering will continue year round and mining excavations will be on an as needed basis. Secondary commodities will be excess overburden for use as clean fill and excess topsoil for projects that require suitable growth medium.

There will be no use of explosives used at any time for any purpose on this site.

EXHIBIT E – Reclamation Plan

The total disturbed area to be reclaimed under this permit is 38.64 acres, which is the entire property minus the road and concrete ditch on the south side. The access road on the 40 acre parcel adjacent to the pit on the west side covers a 1.25 acre strip that will remain in place as is when mining and reclamation are complete. The area of the pond is expected to be 30.0 acres. There will be 8.64 acres above the water line that will need to be ripped and seeded with a dry land seed mix that will not require irrigation. The area inside the 50 foot buffer zone contains 5.69 acres that will not have topsoil or overburden removed. That leaves 2.95 acres above the water line that needs to have topsoil replaced.

As described in the Mining Plan, quality topsoil will be segregated, stockpiled and stabilized with a dry land pasture mix until used in reclamation. Perimeter slopes will be graded concurrently with mining operations to no steeper than 3:1, h:v for 5 feet above the water line to 10 feet below the water line and no steeper than 2:1, h:v to the bottom of the pit. Since the natural gravel will remain in place, these slopes will be stable and require no further compaction.

Topsoil will be replaced on the slopes above the water line as soon as practical. To reduce bond requirements, the operator will commit to no more than 1200 feet of graded slope that still requires topsoil. Topsoil will be replaced by either a scraper or front-end loader and dozer or motor grader. Fine grading will be done with a motor grader. The operator will commit to replacing 8 to 16 inches of topsoil on the area between the 50 foot buffer and the water line. This will require a maximum of 6330 cubic yards of topsoil. The operator does not wish to replace topsoil below the water line since experience with other pits in the area has shown that wave action erodes topsoil below the water line and creates a mud hole that is not desirable for the end use of private recreation. A gravel bottom pond is cleaner and more stable and provides better habitat for aquatic insects and invertebrates.

Seeding of the area above the water line will take place when the entire property has been mined a final all applicable topsoil has been replaced and graded. This will prevent incidental disturbance of seeded areas while there are still mining operations on the property. The areas to be seeded will be ripped and disced to loosen the soil. Seed can be drilled on the entire area. Weed free mulch will be crimped into the surface at 2000 pounds per acre. Fertilizer may be added as determined by soil tests at the time of seeding. Seeding will take place in the fall to take advantage of winter moisture. A dry land seed mix recommended for other pits in the area will be used and is listed below. Experience with other gravel pits in the area has also shown that cattails quickly populate shallow fringes of the ponds once they are allowed to fill. Topsoil dampened at the edge of the pond sprouts a variety of native grasses and any other seeds that are available in the soil or blown in by the wind. There are no trees on the property or the surrounding fields and the operator does not wish to introduce them on this site.

<u>Dry land seed mix</u>	<u>lbs/acre</u>
Four Wing Saltbush	0.25
Rabbitbrush	0.25
Skunkbush Sumac	0.25
Yellow Sweetclover	1.5
Fairway Wheatgrass	1.5
Thickspike Wheatgrass	3.0
Streambank Wheatgrass	<u>3.0</u>
Total	<u>9.75</u>

EXHIBIT S – Permanent Man-made Structures

- a) Above ground power lines and poles along Homestead Road, along the east side of the property and going to the Carver residence near the northeast corner of the property owned by Delta-Montrose Electric Association. Waiver filed.
- b) Waterline along Homestead Road owned by Tri-County Water Conservancy District. Waiver filed.
- c) Phone line along Homestead Road, along the east side of the property and going to the Carver residence near the northeast corner of the property owned by Century Link Communications. Waiver filed.
- d) Homestead Road near the southeast corner of the property owned by Delta County. Waiver filed.
- e) One house, three outbuildings, concrete ditches and a barbed wire fence owned by Hugh Carver on the north side of the property. Waiver attached.
- f) A concrete ditch along Homestead Road east owned by Jared Graff. Waiver to follow.
- g) A concrete ditch and barbed wire fence west of the west end of the new access road owned by Will and Anna Hutchins. Waiver to follow.
- h) A private road going north from the northwest corner of the property owned by J.R. McClur. Waiver to follow.
- i) A private farm road along the north side of the new access road owned by Tom and Cindy Warren. Waiver to follow.

NOTICE

This site is the location of a proposed construction materials operation. Garnet Mesa Investments, LLC, whose address and phone number is P.O. Box 784, Delta, Colorado 81416, 970-874-9968, has applied for a Reclamation Permit with the Mined Land Reclamation Board.

Anyone wishing to comment on the application may view the application at the Delta County Clerk and Recorder's Office, 501 Palmer Street, Delta, Colorado 81416 and should send comments prior to the end of the public comment period to the Division of Reclamation, Mining and Safety, 1313 Sherman Street, Room 215, Denver, Colorado 80203.

Certification:

I, Michael Ripp, hereby certify that I posted a sign containing the above notice for the proposed permit area known as the Warren Pit on August 22, 2012.

Re: Application for a Mined Land Reclamation Permit

We are delivering to you here permit application documents for the Warren
Gravel Pit, pursuant to C.R.S. 34-32.5-110(5)© and 34-32.5-112(9)(a).

Please acknowledge receipt of this copy of the permit application by signing in
the appropriate space provided below and return a signed copy of this cover letter to the
person delivering it.

Respectfully Submitted,
MVR Resources, Inc.

Michael Ripp

Consultant

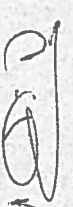

Enclosure
