August 29, 2012

Robert Oswald
Colorado Division of Mining Reclamation and Safety
691 County Road 233, Ste A-2
Durango, CO 81301

Dear Mr. Oswald,

On August 09, 2012, James Blair, the Geologist for the Dolores Public Lands Office, inspected the following Lynx-Royal Notice Level uranium drilling projects with Ryan Weidert of Lynx Royal. These drilling projects are all located on BLM lands in the vicinity of Tgnar, Colorado. They are known by the following BLM and DRMS serial numbers.

Name	BLM Serial Number	DRMS Serial Number
Fore House East	COOK 74221	P20090632
PH1	COOK 74230	P20090637
PH2	COOK 74843	P20090642
Shickrock	COOK 74220	P20090641
UG-PR1	COOK 74692	P20100622
PH	COOK 74250	P20090639
PH	COOK 74230	P20090636

Copies of each inspection report are included with this letter as attachments. All of these projects were drilled during the 2010 or 2011 drilling season. Only those drill sites that were actually disturbed, and identified as needing additional reclamation or time to re-vegetate, as indicated from 2011 inspection reports were revisited in 2012. Earthwork at all of the sites is complete and all sites are stable. No significant erosion problems were observed that appeared likely to be connected to these drilling projects. Vegetation was established at all sites. A few individual drill holes could have had better vegetation growth, however it was clear that they were on the right path, and returning for additional inspections year after year to monitor a fraction of an acre of vegetation growth would not be an efficient use of funds. The cost to the government to continue visiting these sites likely exceeds any remaining reclamation liability. For this reason, I recommend that CDRMS return the bonds for these projects to Lynx-Royal, if CDRMS concurs with this assessment. If you have any additional questions, please contact James Blair at 970-882-6862.

Sincerely,

Connie Clementson
Field Manager
Tres Rios Field Office
