RE: JD-7 Pit, Permit No. M-1979-094-HR, Receipt of Incomplete Regular (112d) Designated Mining Operation Reclamation Permit Amendment Application Package (AM1)

Dear Mr. Williams:

On October 1, 2012, the Division of Reclamation, Mining and Safety (Division) received the above noted AM1 application package. A preliminary review of the materials submitted determined that the following item(s) must be received by the Division before the application can be considered submitted and technical review can begin.

1. Rule 6.4.2 Exhibit B – Index Map

An index map showing the regional location of the affected land and all roads and other access to the area. A standard U.S. Geological Survey topographic quadrangle or equivalent is acceptable. Scale criteria need not be followed for this map.

Note: Your application states that Exhibit B is the same as in the original application. The Division does not have a copy on file of the Exhibit B submitted with the original application package. Please submit an index map for this AM1 application.

Your application will not be considered submitted until the information listed above is received and found sufficient to begin our review. Please submit the above item(s) within sixty days. If the requested item(s) are not received by the Division within sixty days, the Division shall deny the application and terminate the application file.

This letter shall not be construed to mean that there are no other technical deficiencies in your application. The Division will review your application to determine whether it is adequate to meet the requirements of the Act after receipt of all required items.

If you require additional information, or have questions or concerns, please contact me at the Division's Grand Junction Field Office.

Sincerely,

A handwritten signature in blue ink, appearing to read "Dustin Crapla", written over a horizontal line.
