Mike,

My apologies for the delay. I was correct when you called that we had not received the notice from BLM that the site is releasable. I called Stephanie last Wednesday, and she sent the letter via email right away. We made the decision as soon as I got the letter from BLM and I drafted the attached notice the same day. We are required to wait 30 days for any parties that may want to appeal as explained in the attached letter. Please let me know if you want me to mail a hard copy.

Tim,

I am a bit confused and a bit upset after reading your email below. You state that you had not received the notice from BLM that our Crampton Project site was releasable. Attached is the letter I received from the BLM on October 18, 2012 releasing the site; note the Cc at the bottom of the letter where you were copied. DRMS would have received the copy on or about Oct 18. You said in your email that Stephanie sent you a copy of a letter and I suspect that you got a copy of the attached BLM release letter. Didn't you notice that you had been notified? This process should be about a month ahead of the current schedule

As you know I have been calling you repeatedly asking the status and advising you that we sorely need this refund and urging you to keep the process going. Was this problem the fault of the DRMS, the PO system, you or was there something else I should have been doing? I ask again, is there any way this process can be speeded up?

Again my apologies for the delay, but I cannot circumvent our rules. I would suggest that if similar circumstances occur in the future, please contact the Division as soon as you receive time critical documentation to verify we received it, even if the documentation indicates we were copied on it.
